Aquino Reform Plan For Military Seems To Meet U.S. Goals

By Michael Richardson MANILA - Corazon C.

ontlined a program to reform the country's armed forces that is similar to positions advocated by senior U.S. officials.

These officials are worried about the spread of a Communist-led in-surgency in the Philippines and by what they see as the failure of the military and the Marcos govern-Ment to curh its growth.

Mrs. Aquino's stated objectives.

Turning against Marcos is an agonizing journey for the Philip-pine middle class. Page 8.

which include immediate retirement of overage generals, would appear to meet these objectives. Mrs. Aquino's plans seem dein Boths signed to attract support from many Filipino civilians who are critical of alleged abuses of power

by members of the security forces and from younger, reform-minded officers and soldiers. But they represent a direct challenge to the power and interests of long-serving commanders in key positions. Those commanders were appointed by Mr. Marcos, who has been in office since November 1965, and are considered his loyal

supporters.
In a policy speech Monday to the Philippine and foreign Chambers of Commerce, Mrs. Aquino said she would restore professionalism

and honor to the military. "The army will be the army of the people and not a private collection of centurious indentured to ervice of the president," she said. "Overstaying generals will be retired and deserving colonels and other higher ranking officers will be promoted to put fresh vigor into

that 27 of the 103 generals in active service are beyond the retiring age of 56, or 30 years of continuous dervice, which ever comes later. They include General Fabian C. and the heads of the four regular services — the army, navy, air force and Philippine constabulary. They have a combined strength of about

150.000 men. General Ver was reinstated late last year after he, two other generals, 22 other military men and a civilian were acquitted by a special court of involvement in the murder of Mrs. Aquino's husband, Ben-igno S. Aquino Jr., at Manila's airport in August 1983. Mr. Aquino was a principal opposition figure and long-time political rival of Mr.

Mrs. Aquino has been careful PAGE 1 Siming the campaign not to blame FOR MOD the security forces as a whole for excesses. In a speech in the southem city of Davao on Jan. 16, she rocket booster was damaged. It was

By Glenn Frankel

Washington Post Service HARARE, Zimbabwe — To the black-ruled nations perched uneas-Reagan administration's foreign policy in this volatile region appears to have come unhinged with last week's embrace of Jonas Savimbi, the Angolan rebel leader.

On the Indian Ocean side of southern Africa, Washington oow supports the Marxist-oriented government of Mozambique, which is las. Reagan administration offipolicy of "constructive engagewith all the states of southera Africa.

But on the Atlantic side, "constructive engagement" has given way to anti-Communist fervor. Washington has decided to aid Mr. Savimbi, who also gets military aid from Pretoria, in his efforts to overthrow a Marxist government that resembles the one in Mozambique.

In Mozambique, the Reagan administration has committed more than \$5 million to rebuilding a rail line that is vital to regional trans-portation; io Angola, Washington

plans to help rebels who have destroyed another key railroad.

The seeming contradiction is baffling, and frightening, to the reily on South Africa's borders, the gion's black governments. Having Reagan administration's foreign slood by belplessly last month as the government of Lesotho fell under heavy South African pressure, many neighboring African nations fear that their governments may be next and that the United States will do little or nothing to protect them.

Their fears were evident last week at a conference here of nine battling anti-Communist guerril- southern African states - Angola, Botswana, Lesotho, Malawi, Mocials justify this as part of a U.S. zambique, Swaziland, Tanzania, Zambia and Zimbabwe - and 37 other nations, including the United States, to discuss how to wean this region from economic dependence on its white-ruled neighbor.

South Africa prefers to view itself as the region's economic big brother, but its black neighbors see it as having a stranglehold on their economies. Nearly 80 percent of trade in five landlocked states in the region flows through South African ports, rail lines and roads.

Although little was said publicly at the conference, some delegates clearly were upset that U.S. repre-

roads and rail lines in the region. The Angolan U.S. support for Mr. Savimbi,

NEWS ANALYSIS

said Simba Makoni, the regional official who organized the Harare gathering, was "misdirected and very costly both for our region and for the people of Angola."

Mr. Makoni said support for Mr. Savimbi's movement would only prolong the bush war that has impoverished Angola and undermined regional development for more than two decades.

Referring to the stated U.S. goals for the region, he said, "There will be on development, no stability, no Western democracy, no free enterprise system to talk about." The aid to Mr. Savimbi, he added, "will only result in further suffering for the poor people of Angola."

The administration has told congressional intelligence committees that it is considering an initial out-lay of up to \$15 million in covert

sentatives were discussing economid to Mr. Savimbi's National ic development while President Union for the Total Independence

The Angolan government esti-mates that attacks by Mr. Savimhi's rebels, along with periodic South African military operations inside Angola, have cost more than \$10 billion in rained infrastructure during the past decade, said the Angolan representative here, Pedro de Castro Van-Duntem. He is the cabinet minister in charge of energy and a senior member of the

ruling Politburo. The Resgan administration contends that it seeks to play the role of "honest broker" in the region, promoting dialogue between South Africa and its black neighbors.

Chester A. Crocker, the assistant U.S. secretary of state for African affairs, became unpopular with black states when he proposed that independence for the South African-controlled territory of South-West Africa, or Namibia, be linked to the withdrawal of Cuban troops

from neighboring Angola.

Many African leaders would like to see the Cubans leave Angola but view the linkage as injecting ele-ments of East-West confrontation into the issue of independence for

Africa's last colony.

Despite those objections, many southern African states gradually came to accept Mr. Crocker's claim that the administration was seeking warmer ties in the region.

The developing entente between the United States and Mozambique, along with Mr. Crocker's efforts to negotiate a peace settlement between Angola and South Africa, persuaded many to accept his sincerity, if not his policy.

But many Africans say aid to Mr. Savimbi runs sharply counter to Mr. Crocker's claimed policy and threatens to damage American standing here.

Zimbabwe's Foreign Ministry issued a statement saying that Mr. Savimbi's visit to the White House Now controlled 80 percent of "must, once again, call into doubt

WORLD BRIEFS

Police Arrest 1,000 in Lima Bombings LIMA (Reuters) — Peruvian paramitizary police arrested about 1,000 people in an overnight sweep following a series of bombings in Lima on Monday, a police spokesman said Tuesday.

More than 900 of those detained were freed after they produced

identification papers or were identified by friends or relatives, the spokesman said. The dynamite attacks, blamed by authorities on the Maoist guerrilla group Shining Path, were mainly against banks and offices of the ruling American Popular Revolutionary Party, Two persons were injured.

A government spokesman disclosed Tresday that the house of Health ster David Tejada came under machine-gun fire Monday during the assault. No one was injured, he said.

González Defends NATO Membership

MADRID (Reuters) — Prime Minister Felipe González on Tuesday defended Spain's membership in the North Atlantic Treaty Organization saying withdrawal would have impredictable consequences.

Opening a three-day parliamentary debate on his decision to hold referendum March 12 on NATO membership, he said, "There is a division in our public opinion and a vote is needed to bridge the gap."

Mr. Gouzilez, a socialist, urged opposition forces to support his plan to remain in NATO without integration into its military structure, to reduce the U.S. military presence and to maintain the country's nuclear.

U.S. Suspends Arms Sale to Jordan

WASHINGTON (UPI)—President Ronald Reagan, facing certain defeat in Congress, formally suspended Tuesday his proposed sale of \$1.5 billion in military aircraft and other arms to Jordan.

Secretary of State George P. Shultz said in a letter to Dante B. Fascell, Democrat of Florida and chairman of the House Foreign Affairs Committee, that the adm tration would not move on the arms sale without first giving Congress 30 days to block it. Mr. Shultz said that the United

States was working with Jordan and Israel to start direct peace talks and that a congressional vote against the arms sale "would severely damage the ongoing pro-cess." Richard G. Lugar, Republi-can of Indiana and chairman of the Senate Foreign Relations Committee, announced last Friday the arrangement with the admin to indefinitely delay the sale.

India Reports Bomb Caused Air Crash

NEW DELHI (Reuters) — The Indian government said Tuesday the Air India crash off Ireland June 23 that killed all 329 people aboard had been caused by a bomb in the aircraft's forward cargo hold. A report submitted to an official inquiry said the bomb was in the baggage of M. Singh, apparently a Sikh name, and was put on the Boeing 747 at Toronto although he was not on board. The baggage was erroneously transferred from a Canadian Pacific flight from Vancouver, which Mr. Singh haid failed to board, the report said.

Its conclusion that the crash was caused by a bomb in the forward cargo compartment of the aircraft was was supported by evidence from British, U.S. and Indian experts at the inquiry. Hearings on the crash ended Thursday and Justice B.N. Kirpal is expected to submit his conclusions by Feb. 28.

Manson, Called Vicious' and Wild,' Loses 6th Bid for Parole in California

SAN QUENTIN, California -- Charles Manson, serving a life sentence in California for leading followers in the cult murders of seven persons, had his sixth bid for parole rejected Tuesday after attending a hearing. He said in a rambling statement that, if released. he might go to Libya or Iran. He was described at the hearing as a "caged, vicious, wild animal"

by Stephen Kay, one of the prosecutors at his trial. "I'd probably try to stop the rain forests from being cut down," said Mr. Manson, 51. "I'd probably join the revolution down south somewhere and try to save my life on the planet Earth. I might go to Libya. I might go see the ayatollah. I might go to France, catch somebody in France I'm upset with."

Mr. Manson, wearing long, gray hair and with a swastika on his forehead, told the panel he doesn't like to read and spends much of his time in his cell making dolls. Mr. Manson and four members of his "family" of followers were

convicted in the August 1969 slayings in Los Angeles of the actress Sharon Tate, five of her guests and two other people in a separate attack the following night.

va to Lak

or design

Michael Weisskopf reports in The Washington Post that "despite its awesome dimension and extraordinary growth, the defense community today ac-counts for a smaller share of federal spending, national research and development and la-bor force than it did in 1961."

He cites these figures: Military spending took 9.7 percent of the gross national product—the total value of a country's output of goods and services in 1961, but is projected to take 6.8 percent this year.
The Defense Department's

budget as a proportion of the total federal budget has declined since 1961 from \$43.3 billion, or 50.7 percent of the total, to \$278 billion, or 29 percent, in the current fiscal year. However, the spurt in domestic spending caused by President Lyndon Johnson's "Great Society" program was still in the future, and Social Security pay-ments, running about \$13 bil-lion a year in 1961, were not yet being counted as part of the federal budget. Had they been, the defense share would have been about 45 percent.

The military had a share of \$6.1 billion, or 42 percent, of the \$14.32 billion spent on research and development, public and private, in 1961, compared with \$34 billion, or 28.2 percent, of \$117 billion this year. In 1961, Defense Department employees, military and

civilian, and people employed in the defense industry represented 8.7 percent of the total labor force. This year it was 5.7

Short Takes

Despite a tradition that the airport shots at the close of the 1942 film "Casablanca" were taken at the Burbank, California airport, the Los Angeles Times reports that a myth is just a myth: Daily shooting reports disclose that the long shots were taken at nearby Van Nuys airport. Dialogue and anything else involving the actors was filmed on the Warner Bros. lot

Vice President George Bush got special coaching from his staff for his appearance, as president of the Senate, behind the speaker's stand during Pres-

ident Ronald Reagan's State of the Union address. Caught by television crews in the past who were trying to film something other than 20 straight minutes of the president, Mr. Bush has been an unwitting cameo performer, yawning, slumping, gazing into space and looking otherwise preoccupied.

The U.S. Travel and Tourism Administration says the largest numbers of foreign visitors last year came from Canada, Mexi-co and Japan.

Why the White House **Prefers Dogs to Cats**

Noting the publicity over dogs owned by American presidents, from Franklin Roose-velt's Fala to Richard Nixon's King Timahoe to Ronald Rea-gan's Rex. The New York Times asks: "What explains the presidential predilection for dogs rather than cats?
"Is it that even the friendliest

feline projects a certain hauteur when faced with a camera? That a cat's refusal to be leashed eliminates the possibility of charming president-walks-cat photographs? That a day in the life of a cat - 20-hour snooze, 10 minutes pushing a bottle cap across a room and one minute spitting up a hair ball - is

hardly front-page stuff? "More likely, it's simply that a cat can be an unnerving companion. A cat's gaze, after all, is unvaryingly critical. It seldom comes when called, won't extend its paw to be shaken or roll over and play dead. It is, in fact, the Opposition rolled into one small, furry body. Small won-der the White House has harbored so lew."

Welcome to Germany.

U.S. Weighs 3 Responses To Gorbachev on Arms

administration is considering three widely varying approaches in its deliberations over how to respond to Mikhail S. Gorbachev's proposal on Jan. 15 calling for the gradual elimination of nuclear weapons. climination of nuclear weapons.

The possible responses, offered respectively by the Arms Control and Disarmament Agency, the State Department and the Defeuse Department, were considered at a meeting Monday of the National Security Council, administration officials said.

A White House official said the administration was "still in the process of working on it" and that no decision would be made before consulting the United States's Eucopeasts that the Reagan and ropean allies. President Ronald Reagan is ex-

The specifics of the administration's stance may also be discussed in the Geneva arms control talks.

Administration officials said here was agreement on a "general"

Specifically, the State Department favors amending the administration's proposal to ban all mobile in the Geneva arms control talks. there was agreement on a "general framework" for responding to Mr. Gorbachev's offer. They said that within that framework Mr. Reagan would repeat his call for the eventual eliminatinn of all nuclear weapons under certain conditions. such as an improved balance in

conventional forces. goals remain deep reductions in ni-leasive arms and continued re-search on a space-based defensive

The proposal to ban mobile mis-siles, which was incorporated in the administration's arms control pro-

nuclear weapons should be eliminated and that both superpowers should renowne development and should renounce development and deployment of anti-missile systems such as the space-based defense

Mr. Reagan supports. Defense Secretary Caspar W. Weinberger's office has suggested that there is no need to change the said. Weinberger aides say the Gorbachev proposal is a public rela-

tions effort of little substance. In contrast, the Arms Control and Disarmament Agency wants to respond positively to parts of Mr. Gorbachev's proposal dealing with medium-range weapons.

Mr. Gorbachev has suggested that the United States and the Sovisiles in Europe in the lirst part of bis three-consults also believed of nuclear west-one his three-step plan. Britain and France would be allowed to keep

their forces during this stage but would agree not to enlarge them.
In response to that part of the proposal, American officials say.

By Michael R. Gordon

New York Times Service

WASHINGTON—The Reagan

Improvement of the arms control agency approach calls for "picking up" the Soviet suggestion to diminate the U.S. Soviet Union.

This would be a shift from the

current American proposal to reduce missiles in Europe and achieve "proportionate" cuts on Soviet missiles in Asia. In addition, provisions for on-site verification inspections would be taken up with the Soviet Union.

The third possible U.S. response offered by the State Department, takes a similar stand on cutting

But the State Department also suggests that the Reagan adminis-tration make moves in the area of pected to respond formally to the Soviet leader's proposal in a letter.

Soviet leader's proposal in a letter. treaty, officials said.

missiles. Instead, it would seek a ban on multiple-warhead mobile

That adjustment would allow both the United States and the Soviet Union to deploy versions of single-warhead nuclear missiles: the American Midgetman and the Soviet SS-25.

posal before the November summit Mr. Gorbachev had said that all nuclear weapons should be eliminated and that had been criticized

The State Department also has proposed that the United States take steps to shore up the 1972 antiballistic missile treaty. This could include a commitment to stick with the treaty for a specified period.

The Soviet Union, at the opening on Tuesday of the 1986 session of the 40-nation Disarmament Conference in Geneva, challenged Washington to begin negotiations on banning all nuclear tests, Unit-ed Press International reported.

The Soviet delegate, Viktor L. Israelian, said the United States should "confirm in deeds" its de-

Lufthansa

Ethiopia's Trail of Tears

Ethiopia is uprooting about 1.5 million peo-ple in what its Marxist regime calls a "voluntary" rescritlement program. But a reputable France-based relief agency, Doctors Without Borders, insists otherwise. It says villagers in the northern highlands are being trucked to infested southern wetlands in a forced migration and estimates that 100,000 lives have been lost. Ethiopia says the charges are "without foundation" and asserts that United Nations

observers dispute the casualty estimates. Not quite. The UN experts say the toll may be overstated but they claim to have no independent figures. The observers of American relief agencies deplore the resettlements but refuse to debate it, lest they be expelled, like Doctors Without Borders.

All those engaged in relief thus juggle the old dilemma of trying to feed the starving in a

nation that resents their presence.

Unfortunately, there are good reasons to heed the medical group's warnings. The authorities in Ethiopia contend they have only reactivated an old plan for moving villagers from the parched north to the more fertile south. But they stand to gain strategically from depopulating an area where a guerrilla insur-

gency flourishes. And their methods, by all reports, are horrendous.

Villagers are being herded into "regroup ment centers," then crammed into trucks and buses and dumped into makeshift resettlement camps. The entire effort appears to be a frantic improvisation, showing little regard, the doctors say, for the health of already weakened highlanders, who lack immune defenses inst lowland diseases. As one of the doctors said in recounting work in an inadequate clinic, "We are an orphan factory."

The cruelty of the operation is not in dispute. Observers willing to talk at all argue only about the number of fatalities.

The humane response is to continue sending food and relief workers to Ethiopia, taking care not to assist the resettlement campaign in any direct way. That is the policy of the United States and should also be the UN's. Americans have already distributed more than 450,000 tons of food through private agencies. Current U.S. shipments will again provide about a third of Ethiopia's need. As the aid grows, so should the demand for a resettlement moratorium. Ethiopians are suffering enough.

-THE NEW YORK TIMES.

The Senate's Bad Tax Idea

Leading members of the Senate Finance Committee are considering the use of an oil import fee to help finance "tax reform." Administration officials concerned about the shaky math of the tax bill -it is supposed to make a lot of people happy but not lose money
— are encouraging them. But it is a terrible idea. In a single stroke it would create a much less progressive federal tax structure and a iovely windfall for the domestic oil industry, while dissipating both the wherewithal and likelihood of reducing the deficit, against the need for which tax reform is a freckle.

It may help to recount a little history here. The tax reform proposal that the president sent Congress last spring involved two tradeoffs. One was lower rates for individuals and businesses in return for fewer preferences. The other was an associated shift of the tax burden back from individuals to business, in effect a further recovery of the too-large business tax cuts of the first Reagan year.

The controlling Democrats on the House Ways and Means Committee were remarkably faithful to this outline. But when time came to vote last December, Republicans complained that the administration bill had somehow become anti-savings, anti-growth and anti-business. The White House itself bedged a little. To win votes of resisting Republicans, the president bad to pledge that in the Senate be would press for deeper cuts in rates than in the House

bill, and fewer cuts in incentives to inves Mr. Reagan promised to veto any final bill that failed to meet those goals.

The finance panel has never been a center of enthusiasm for tax reform as now defined. Its senior members are authors of many of the preferences the president's proposal and the House bill would climinate. It is now also under pressure, from the president, to undo some provisions in the House bill that would raise revenue, while accentuating some that would lose it. That is why it needs money but an import fee is the wrong way to raise it. By turning to an import fee, the panel would:

1. Be using the moral equivalent of a sales tax on a necessity to pay for fower income tax rates. To ease a tax that falls hardest on the rich, it would impose one that would be felt most by the poor.

2. Be hurting the Northeast, the region most dependent on imports, while helping domestic energy producers. The tax would raise the imported energy (or keep it from falling as much as otherwise). That would give domestic producers room to raise their prices. 3. Be raising taxes to balance the tax bill instead of the budget. There is only so much

tax increasing Congress can expect to do this year in the best of circumstances. To cut rates, cut preferences. That was a good idea last year in the House. It still is.

- THE WASHINGTON POST.

Other Opinion

Museveni Deserves Support

in Yoweri Museveni's favor. One is that he and incumbent, Ferdinand E. Marcos and an unhis organization have no obvious tribal or religious commitments, a lack of which can only be beneficial in a country so divided on factional lines as Uganda. The other is that he is not tainted with past subservience to Milton Obote or Idi Amin. Dancing in the streets after an African coun is neither unusual nor a clue to the character of the new regime. But the revels in Kampala began on the first night in many years that the battered capital was not terrorized by gunfire.

During its time in the bush the National Resistance Army acquired an unusual reputation for shunning the random slaughter which has killed so many Ugandans in 24 years of blighted independence. Although many supporters of General Tito Okello managed to fice with their weapons, leaving the new government with potentially serious security prob-lems for the future, Mr. Museveni's takeover has been impressively smooth.

Mr. Museveni's proclaimed commitment to democracy and human rights, the exclusion of those with compromised political records, the avoidance of doctrinaire posturing and the appeal for internal support, together suggest that the new leader has got his priorites right. He deserves support; and the sooner this is translated into practical aid, the better. - The Guardian (London).

A U.S. Nightmare in Philippines

From Washington the presidential election in the Philippines must look increasingly like a ughtmare. There on Friday will be determined

the future governance of this archipelago upon Two immediately recognizable factors work which America depends heavily for its military role in the Pacific. Choice lies between the practiced politician, Corazon Aguino.

So America will be landed either with a fresh term for n debilitated Mr. Marcos or a tyro who, for all her appeal, is unlikely to halt the advance of the Communist New People's Army for long. Moreover, she would put a term on America's bases there. If the Americans were to weary of effort in the Philippines it is on the cards that the Soviet Union might step on to the carpet laid down by the NPA. Were the Soviet Union to add influence in the Philippines to its formidable base at Cam Ranh Bay, the balance of power in the Pacifie would alter sharply. Bad dreams for the North Atlantic Treaty Organization would follow.

— The Daily Telegraph (London).

Honduras Is Still a U.S. Pawn

Bucking a tide of instability in Central America, José Azcona Hoyo last week became the first civilian leader in 50 years to succeed another elected civilian as the president of Honduras. But Mr. Azcona's inauguration of-fers scant hope for the region; he is virtually powerless to change his nation's role as America's most valuable pawn in the Central American crisis. For the last five years, as the Reagan administration has become increasingly sessed with the presumed dangers posed by the Sandinist revolution in Nicaragua, Honduras has become the center of U.S. military activities in Central America. This overbearing military presence has badly distorted the politics of an extremely poor and backward nation. - Los Angeles Times.

FROM OUR FEB. 5 PAGES, 75 AND 50 YEARS AGO

1911: Spanish Paper Berates America 1936: Lords to Abolish Trial by Peers MADRID - One of the most violent articles published in Spanish against the United States since 1898 has appeared in the "Liberal." When the article touches upon the Treaty of Paris, "which sanctioned the greatest abuse of force ever known in history," it says that the United States, whose only aim was to liberate Cuba, "pounced upon Puerto Rico and the Philippines." The article, reviewing the present atuation in Puerto Rico, states that the natives there are in utter poverty. It says that the inhabitants are dving from starvation, and some even in the streets of Ponce and the outskirts of San Juan. Of the Philippines, it says that the Americans have spread "desolation and panic in the islands." Cuba, it 2dds, is under a "shameful protectorate."

LONDON - The House of Lords [on Feb. 4] adopted by 45 votes against 24 a resolution moved by Lord Sankey, former Lord Chancellor, that the form of trial of a peer by his peers has "outlived its usefulness." In view of this vote, this picturesque form of trial, which dates from the time of the Norman kings, will be abolished. The last peer to be tried by the House of Lords sitting as a peers' court was Lord de Clifford on Dec. 12. He was charged with manslaughter in connection with the death of a man whom he had run over while driving his automobile. He was acquitted. Referring to the trial, Lord Sankey said "fortunately" it had lasted only one day, but that four Lords had been taken from their work at the courts to advise on questions which arose.

U.S. Ignored Signs of Friendship in Yemen

J ACKSONVILLE, Illinois — By its own choice the United States has remained a bystander in the tumnituous events that have recently rocked the People's Democratic Republic of Yemen, one of the most strategically important pieces of real estate in the world.

The U.S. government has missed many oppor-tunities to keep the Soviet Union from using South Yemen as an exclusive asset in carrying out its political, economic and military activities in neighboring Ethiopia and Sudan.

The U.S. State Department has always found

an excuse for inaction, and now rather lamely cites the civil war between rival Marrist factions as an embarrassing setback for the Soviet Union, South Yemen's chief benefactor. But the American government can find no reason for rejoicing. Regardless of the ultimate outcome of the power struggle, the Soviet Union has retained a significant measure of influence in this important crossroads of the world.

Aden, South Yemen's capital, is the main port for ships using the Suez Canal and a principal service center for Soviet military vessels and aircraft. Two South Yemen islands are strategically situated. In the Gulf of Aden, Socotra provides military services to a wide variety of Soviet forces. Perim lies in the straits at the southern entrance to the Red Sea.

The U.S. government has effectively yielded this field to the Soviet Union, the only foreign power with military facilities in the country, despite South Yemen's vital importance - past, present and future —in America's relations with the Middle East, the Gulf states, East Africa and the Indian Ocean region.
Since 1969, when South Yemen, in a delayed

reaction to U.S. support of Israel in the 1967 war with Arab states, broke diplomatic relations and expelled all American citizens, the United States has had no official presence. No representative of the U.S. executive branch has so much as

By Paul Findley

remained overnight during these 17 momentous years, despite repeated invitations.
In fact, I am the only U.S. official to visit Aden. in all that time. I went in March 1974 to plead for the release of a constituent from prison, and President Salem Rubayi Ali granted my request; at Mr. Rubayi Ali's invitation, I returned in January 1978, for a visit. During my 22 years in Congress I had first-hand knowledge of several attempts by South Yemen to improve relations with America, starting with the release of my constituent and two other U.S. citizens.

Only once did the U.S. government make u positive response, but it came too late. In June 1978, after keeping Mr. Rubayi Ali waiting for five months, the United States sent a team to take up the question of diplomatic relations, but the day before its scheduled arrival Mr. Rubayi Ali was overthrown and executed in n comp. The

U.S. team, although invited to meet with Mr. Rubsyi Ali's successor, returned to Washington. Since then the State Department has been content to let the Soviet Union have a free hand in using Aden as a transit point in its domination of Ethiopia and its growing role

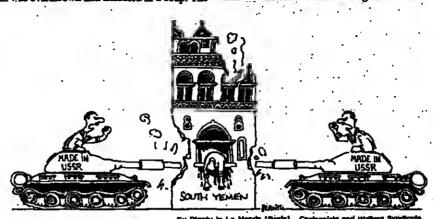

throughout the Horn of Africa.

If the United States had quickly seized the hand of friendship offered by Mr. Rubsyi Aliand his successors and established a diplomatic mission, listening post and aid program in Aden, the course of recent events might have been different. Forces friendly to America could have

been encouraged in the present warfare.

As it is, no matter who is the loser or winner in Aden, the Soviet Union is the real winner. After all, Moscow's is the only game in town.

The Cost of EC Entry Is High for Spain and Portugal

By Giles Merritt

MADRID — Strange as it may seem, Spain and Portugal are Spain's charismatic Prime Minister only now beginning to count the cost of membership in the European Felipe González, 43, told me and other visiting journalists that he wel-Community. Both joined a month ago, and they are bracing themselves comes still closer political links with the community as well as the new economic winds that will blow away for the full shock to hit. It might seem a little late in the day

to start worrying about the price tag of EC entry, but the two Iberian countries have until now seen community membership chiefly as a political act designed to underpin their fledgling democracies. All other considerations have been secondary. Madrid and Lisbon nevertheless

know that the strain on their economies is going to be considerable. In Spain there will be rises in unemployment as well as inflation, while Portugal, a poor country in European terms, runs the risk that the community's free trade rules could condemn

it to lasting pennry.

The industrialized countries of northern Europe, meanwhile, may soon discover that enlargement of the community to 12 member states will alter their position. Although the newcomers are fervent supporters of closer European integration, their laggard economies mean that there is very little true identity of interests with the richer north.

At present, however, the mood in both the Iberian capitals is upbeat and almost aggressively self-confident. Youth and boundless energy seem to be the keynote of the Spanish government and to a lesser extent. of Portugal's, too.

lower wages. The result is that Spanish industry may soon be swamped by competitively priced imports.

The Spanish automobile industry, for instance, which is often pointed to as the country's most dynamic export trailblazer, is highly vulnerable. The the cobwebs of byper-protectionism. In Lisbon, Prime Minister Anabal Cavaco Silva, 47, echoed these sentipresent aggressive export drive by SEAT, symbolized by its bold TV ments. A former economics profes- advertising campaign in France,

As Portugal has a mainly light manufacturing industry, the danger is that Spain will dominate areas in which Portagal hopes to establish itself.

sor, be stressed his belief that Portu-tends to act as a smoke screen hiding gal's economic growth will be industry experts' warnings that the 13

stimulated by EC membership. Yet the indicators in both countries make it plain that for the foresecable future the experience of playing in the senior league will mean hard knocks. And while for Spain that may be stimulating for Portugal it could be so debilitating that the Portuguese will have to live on intravenous EC economic aid.

The tariff walls that until now have protected Spanish companies have permitted worrymaly low productivity - on average about 20 percent lower than in northern European inpercent of the Spanish market now taken by imported cars will be closer to 25 percent by 1992.

Spain's textiles sector is likely to lose 20 percent of its exports and of the 100,000-strong work force. In heavy capital equipment industries the shakeout will be much worse, with 50 percent of all jobs threatened. Even restructured industries like shipbuilding and steel are in deep trouble thanks to tough competition

Spain's political and economic achievements of the past decade should not be minimized, nor should dostry. The costs of employing labor are about the same in Spain as in the its chances of emerging leaner and meaner from the experience of EC high social charges that cancel out entry. Spanish high technology may

not yet be homegrown, but its industry is encouragingly active in areas such as fiber optics and artificial

intelligence in computers.

Although only 10.5 percent of the 32 billion in foreign investments now pouring in every year actually goes on creating new companies, the list of investors includes American Telephone & Telegraph, Hewlett-Pack-ard, Sperry, Siemens and Olivetti. Spearheading Japanese investment are firms like Fujitsu and Sanyo.

In neighboring Portugal, however, there is much less of a sense of a nation that can be forged into a hard new industrial shape by the heat of competition. Lisbon, with its crumbling imperial grandeur, is today more like one of those Third World cities where old cars go to die. Portugal still has 22 percent of its work force on the land, and the farm minis-ter says despairingly that none of the main agricultural sectors is really

competitive enough to export.

Portuguese industry tends involve light manufacturing, like textiles, shoes and ceramics, and the danger is that neighboring Spain will dominate areas in which Portugal is hoping to establish itself. Portugal will receive about 1 billion ECUs (or \$900 million) a year from Brussels, equivalent disadvantage is it may quickly be-come reliant on EC handouts. That would have precisely the opposite ef-fect in Portugal to what EC member-

ship is meant to have.

It's Time for Japan and Germany to Be 'Locomotive'

By Robert M. Dunn Jr.

WASHINGTON — The United States is about to get a much tighter fiscal policy, thanks to Gramm-Rudman. Since the massive federal budget deficits of the early 1980s have been widely blamed for almost every imaginable economic ill, one might expect that this tightening of U.S. fiscal policy would improve performance in the world economy. Unforumately, that expectation is badly misguided, and the imposition of the Gramm-Rudman deficit reductions will cause serious problems

abroad unless budget policies in Europe and Japan become significantly more expansionary. Massive U.S. Treasury borrowing and a restrictive monetary policy in America produced high real interest rates. This uttracted buge capital flows from abroad, bidding the dollar up sharply and leaving the United States with a 1985 trade deficit totaling \$148.5 billion.

This trade deficit has had devastating effects on U.S. agriculture, mining and a range of manufacturing industries, encouraging an outbreak of protectionist sentiment. As the ited States shifts toward a tighter budget and an easier monetary po-licy, real interest rates should fall, capital inflows should decline and the dollar should depreciate to the levels of the late 1970s. Then U.S. tradable goods industries should recover. It

seems simple: Unfortunately, it isn't The problem is that America's trade deficit is the rest of the world's surplus, a surplus that has recently been n major source of economic growth in Europe and the developing countries that don't produce oil. As the U.S. current account (merchandise trade plus services) deteriorated by more than \$100 billion between 1931 and 1984, current account results in those non-oil developing countries improved by \$65 billion. fodustrialized countries other than the United States had a gain of \$72

billion during the same period.

As America adopts a set of fiscal and monetary policies that should bring the dollar down sharply and significantly improve its trade account performance, the effects abroad will be harmful unless simultaneous policy adjustments occur in Japan and Europe. A \$100-billion improvement in the U.S. trade balance means a trade-account deterioration and loss of aggregate demand of that amount in other countries. If no other policy changes oc-

curred, the European recovery from the recession of the early 1980s would

be slowed or halted, and the im-

tries would be reversed.

American economy through a wors-

largely drains the expansionary im-pact of those deficits out of the ening of the trade balance. The parallel improvement in trade accounts of foreign countries means that this expansionary impact is drained into their economies. Europe and the non-oil developing would cannot afford such a restrictive shock.

The United States has played the role of Keynesian "locomotive" for expenditures by total amounts that the rest of the world for four years, match the reduction of the U.S. defi-

The prospects for debtor countries in the Third World would be particularly goin. Their exports would be dollar, devastated export- and import- competing industries and account and by slower growth in their European markets. Since these debtor countries are critically dependent. United States has squandered a net on growing export revenues to pay creditor position of well over \$100 interest and principal to U.S. banks, billion and is now accumulating net

If present German and Japanese fiscal policy trends are maintained, a major tightening of the U.S. federal budget will have dangerous effects abroad.

The appreciation of the dollar re-sulting from larger federal deficits

debt-servicing problems would worsen, and some New York banks could \$120 billion a year.

The rest of the world has benefited by America playing this role, but the costs to the United States have been excessive. The problem is how to eliminate these costs to the United States without pushing Europe to-ward recession and debtor develop-

ing countries, toward bankruptcy.

The answer is a tightening of the U.S. budget that is coordinated with an easing of fiscal policies abroad, particularly in Japan and Germany. If the stronger industrialized countries cut taxes or increase government

cit under Gramm-Rudman, aggre-gate demand in the world economy will be approximately unchanged. This pattern of adjustment would avoid a recession in Europe and a deterioration of trade balances and debt-servicing abilities in the devel-oping countries. Only Japan and West Germany now have sufficiently strong fixed situations to undertake strong fiscal situations to undertake such a policy shift, so the major burden of adjustment must fall on them. Unfortunately, Japan and Germa-

moving in exactly the wrong direc-tion. Austerity has been imposed in both. Their deficits fell from about 3.9 percent of gross national product in 1981 to 1.4 percent in 1985 and are expected to fall further in 1986. If existing German and Japanese fiscal policy trends are maintained, the major rightening of the U.S. federal budget required by Gramm-Rudman will have dangerous effects abroad. The reduction of U.S. defi-cits must be accompanied by a reversal of the fiscal policies being pursued in Boan and Tokyo. It is time for America's stronger allies to take on the role of Keynesian "locomotive" as the United States gives it up.

ny have budgetary policies that are

The writer, a professor of economics at George Washington University in Washington D.C., contributed this comment to The Washington Post.

Deficits Look Better Inflation-Adjusted

By Tom Wicker

N EW YORK — The best thing Congress and President Reagan could do about the Gramm-Radman-Hollings deficit reduction plan is to repeal it.

\$153 billion, were so corrected they would be seen, instead, as an accumulated surplus of \$72 billion. If, moreover, the federal government maintained a capital

Mr. Reagan is expected to call this week for a 1987 budget with a 6-percent increase in military spending and measures to meet the \$144-billion deficit limit set by Gramm-Rudman without a tax increase. That would require such drastic cuts in the 15 percent of the budget not devoted to interest, military spending and entitlement programs that no one but the president gives it a chance. Instead, Democrats and Republicans are talking of a

marginally preferable plan within the Gramm-Rudman limits with more sensible, but still severe domestic and military spending cuts, plus a tax increase. The problems with that is that it isn't necessary and could be disastrous. It isn't necessary because the budget deficit, while too large, does not pose a national crisis that can only be met with such extraordinary steps as those provided in Gramm-Rudman; nor does it require the undoing of major social programs and an end to the military buildup.

It does not dictate a tax increase, either, The conventional wisdom, imitating Chicken Little, proclaims the sky is about to fall, owing to deficits in the \$200 billion range. In fact, if the deficit were corrected for inflation, its practical effect would be seen as far less damaging than such figures suggest. If, for example, the supposed deficits of the Carter administration, totaling

budget, its yearly operating deficit would be substantially smaller, much of the "deficit" actually is investment. And

the federal government's total debt of about \$2 trillion is offset by its roughly \$2 trillion in real assets.

But even if you take today's deficits at face value, as an economist, Robert Heilbroner, pointed out last July in The New Yorker, they're running at only about 5 percent of America's gross national product.

To reduce the deficit in fiscal 1987 by, say, \$35 billion to \$40 billion, by spending cuts, tax increases, or both, is to take that much out of an already nervous economy; to do it a year or two in a row could shut down economic growth; to do it every year for the next five, as dictated by Gramm-Radman, would create a huge budget surplus that could bring on a deep recession.

What does need to be done is to stretch out military spending over three or four additional years, without necessarily cutting back the total planned buildup. An easing of monetary policy by the Federal Reserve Board would encourage economic growth and have a downward effect on interest rates and the strength of the dollar. That would also attack the pressing problem of

The New York Times.

the American trade deficit.

ellites, so space launch remains vital.

The tendency to reduce emphasis on far-feuched ideas existed before the sorrowful launch of Challenger and its crew. The tragedy is bound to influence further arguments in many ways, not only assumptions about technology, whether or not the enormous extra expense and complexity of manned missions is worthwhile, but also by the demonstration that there can be no certainty things will

Realities

By Flora Lewis

DARIS - There has been an im-

Portant shift in the focus of offi-cial thinking about strategic missile

defense, away from space-based ex-

otic weapons toward rather less ambitious land-based systems. But in

any case, "star wars" depends on sai-

always work as planned. The public explanation for concentraing less on space-based notions now is budget constraints. But behind that, there seems to be a new admission that the big breakthrough. in exotics aren't coming and aren't

likely to come for a long time, if ever. This has crucial implications for the whole strategy as advertised. The-plan was that the X-ray laser would intercept the bulk of oncoming mis-siles in boost phase, before tens of thousands of warheads and decoys separated to sprinkle the skies with targets. Remaining "layers" of de-lense, first described as three but lately amplified to seven, would have to deal only with what "leaked" past. But the X-ray laser has come un

serious doubt. Even if it could be made to work it would require a large nuclear explosion in space as the key element in what Ronald Reagan has repeatedly said would be a non-nuclear defense. There's no other scheme in sight likely to have a chance of creating a fairly effective

boost-phase screen. That means revising plans to pay more attention to mid-course attack, a much bigger job. To do that requires devices that can discriminate almost instantly between harmless decoys intended to mislead and saturate the defense, and the real war-heads. Particle beams have shown some promise for this capacity, so the planners are beginning to say that boost phase doesn't matter so much, though such a change is basic to the whole idea of "star wars," or the

Strategic Defense Initiative Further, while it would be an advantage to have the source of immense bursts of energy required already stationed in space, it is becoming increasingly evident that that would be much more difficult and expensive than foreseen. Thus,

look back to the ground. The way the SDI program is being promoted adds an extra urgency to this shift. There is an intense effort to distribute contracts and involve as many people in the program as quick-ly as possible, so as to create a longterm constituency for continuing when the administration changes and the skeptics may have more chance to be heard. But contracts can't be granted to build a dream; there has to

be something concrete to work on. nd Planners now seem to be turning their major hopes to "kinetic kill," ordinary collisions with precision-

ordinary collisions with precisionguided projectiles, though of course
they will have nothing like the speed
of light or range of lasers' travel.
These technical questions are at
the heart of the program, even before
addressing the problem of miracle
computers required to command and control all the parts of the system without ever having a realistic test. It is vital for the public to look into them, for only as evidence emerges that they can be solved can there be anything more than theological polemics about the morality of nuclear

weapons versus space defense. Meanwhile there is NASP — the National Aerospace Plane. It isn't a very new idea: The British have been working on it for some time. But the U.S. Air Force and the SDI Office are now putting a lot of money into it and have just declassified its previous code name, "Copper Canyon." Civilian aviation firms are in-

volved in hopes of producing a plane that could go from New York to Tokyo in 90 minutes. But the biggest interest would be a capacity for horizontal space launch, carrying cargo into orbit at a fraction of the cost of vertical rocket launches, now esti-mated at \$3,000 a pound (454 grams). With an engine that would burn oxygen from the atmosphere but achieve the speed to escape gravity, it is projected that NASP could bring the price down to \$300, some even say \$30, n pound. Rockets have to carry their own oxygen and hydrogen, some 70 percent of their launch weight, and it was those big tanks

that apparently caused the last week's Challenger explosion. NASP would change much about space missions, for military as well as civilian purposes. It is another reason to look more closely nt all these projects. Technology isn't a panacea. It's real inventions, or it's delusion and tragic waste.

The New York Times

LETTER 'Star Wars' Is Obstacle

By dismissing the new Soviet pro-posal for the elimination of all nuclear weapons by the year 2000 as "unrealistic" and a "propaganda gimmick," Christoph Bertram does a disservice. , Final Rally Brings Out Large Crowd For Aquino

By John Burgess Washington Post Service MANILA - Elated supporters of Corazon C. Aquino, the opposition presidential candidate, paralyzed central Manila on Tuesday with the largest crowds of her campaign and the last major rally before voting on Friday.

President Ferdinand E. Marcos. meanwhile, pulled out of a scheduled appearance with Mrs. Aquino on an American television program, which would have approximated a debate.

Mrs. Aquino rejected his call for a debate on Manila television, say-ing she would not get fair treatment because of government control of the format and interviewers.

Tuesday's rally was estimated by foreign reporters to involve 100,000. people or more. It began in early afternoon as cars, buses and motorvicles bearing Mrs. Aquino parti-sans converged on Rizal park from around the city. Many of the supporters were yellow, the campaign's color.

Traffic came to a halt as yellow confetti rained down from highrise buildings, horns honked and firecrackers exploded.

Tuesday night, Mrs. Aquino was cheered by thousands as she was driven through the city to the rally. She finally took the microphone about eight hours after it began. She led the group in singing a Tagalog version of the Lord's Pray-

er. "I am sure we have won the election," she said. "Marcos will not be able to stop this," she added. "It's our chance to

write history." The day began with reports in the Manila press that Mr. Marcos and Mrs. Aquino would appear to-gether live from Manila on the Wednesday night edition of the ABC television network's "Nightline" program in the United States. That would be around noon Thursday. Manila time.

The two candidates had been unable to work out a formula for a debate on local television.

Mrs. Aquino noted that television stations in the Philippines have given far more air time to Mr. Marcos's campaign than to her. She had insisted on a place and format that would not be under Mr. Marcos's control. He called the to help ensure peace and order dur-

Woman Given Artificial Heart Without U.S. Agency Approval

TUCSON, Arizona - A 40year-old woman given a scaleddown artificial beart without U.S. government approval was in criti-cal condition but making progress Tuesday, while doctors in Pittsburgh said they feared infection in a man given a full-sized version of the metal-and-plastic pump.

Bernadette Chayrez, a factory worker who had been dying of flu-like infection, on Monday became the second woman to receive the Jarvik-70, which is smaller than the version that has been implanted in about a dozen male padents.

The heart, implanted during an operation that lasted four bours and 45 minutes, doubled the amount of oxygen in her "extremely sick heart," said Dr. Jack Copeland, head of the University Medical Ceoter's traosplaot and

artificial heart programs. Dr. Copeland, who performed the implant, indicated that Ms. Chayrez's kidneys, lungs and liver were functioning better and that she had no lever, according to Nina Trasoff, a hospital spokeswoman. The patient showed no signs of an active flu infection or of pneumonia, as had been feared, the spokeswoman said.

The decision to implant the Jar-vik-70 was made Monday morning after Ms. Chayrez began experienc-ing multiple organ failure, Dr. Copeland said.

The medical center received "im-Food and Drug Administration for use of the heart, manufactured by

plied approval" from the U.S.

Symbion Inc. in Salt Lake City, he ed, and had been using faulty

In Washington, Mark Barnett, infection following the second maan official of the agency, said there jor operation on the Pennsylvania was no plan to punish Symbion, although the company technically violated FDA standards by shipping the Jarvik-70 for temporary

Turning Against Marcos: An Agonizing Journey for the Middle Class

By Seth Mydans New York Times Service

ANILA — By Philippine standards, Bing Roxas and her family have done well for themselves. With her husband Sixto, an investment banker from whom she is now separated, she has raised six children, and the family has enjoyed relative financial success, together with the satisfaction of being involved in the mainstream of Philippine society.

Mrs. Roxas, 58, has been chairman of several cultural and civic organizations, and at one time she and her husband were frequent guests of President Ferdinand E. Marcos and his wife, Imelda, at Malacanang Palace. Like so many members of the Philippine establishment, Mrs. Rozas also has strong ties to the United States: She was educated at Barnard College in New York, and her ideas and manner of speech seem almost those of a native American.

Yet recently, Mrs. Roxas stood with thousands of other Filipinos in front of the U.S. Embassy in Manila, her fist raised in defiance as she chanted angry slogans and protested continued American support for the Marcos government. Like many other men and women who stood beside her - members of what is known here as the burgis, or bourgeois, establishment
— Mrs. Roxas and ber Iamily have traveled a path from conformity to dis-

Increasingly disillusioned by the arrogance and corruption of the Marcos regime, she was shocked into protest and activism in August 1983, when the country's most popular opposition leader, Benigno S. Aquino Jr., was murdered upon his return from self-imposed exile in the United States. Since then, her radicalism, like that of many of her contemporaries, has moved almost faster than she could control.

For Mrs. Roxas as for many other Filipinos. the presidential elections on Friday thus mark not only a national turning point, but a personal one as well, the culmination of a long journey through the ironies and tragedies of recent Philippine history. Her opposition to the 20-year regime of Mr. Marcos and her desperate hope for change under his challenger, Mr. Aquino's widow, Corazon, have become deeply personal.

The path followed by Mrs. Roxas and her family is a familiar ooc, reflecting the conflicts and changes that are taking place within what might best be called the Philippine middle class -the broad group of middle- and high-income

Bing Roxas, right, is typical of the middle class that has become disillusioned.

Filipinos whose education and affluence set them apart from the country's landless peasant majority.

group enjoy a relatively high standard of living, and their support has played a crucial role in perpetuating Mr. Marcos's rule.

country's urban areas, the members of this common purpose.

Mrs. Roxas' earliest impressions of her nation More than one in four Filipinos, it is estimat- and its relationship with America were shaped ed, fall into this group. Located primarily in the not by anger and dissent, but by devotion and

In the early days of World War II, her father, a journalist, and her mother, a young Filipino socialite and founder of the nation's Girl Scout movement, witnessed the last days of the Bataan Death March as the survivors were led by their Japanese conquerors to prison north of Manila. The scene of the exhausted and starving American and Filipino prisoners, more than 15,000 of whom died on the monthlong forced march, so affected the couple that they joined the Philip-pine underground and smuggled food, clothing, medicine and information to the prisoners. The couple was discovered and captured by the apanese as American troops closed in on Mamila in 1945.

"Obviously, my parents were both executed," says Mrs. Roxas, "but we never found their

Bing Roxas, whose proper Christian name is Maria Theresa, hid in the village of Santa Ana outside Manila, and there, at the age of 17, she witnessed the liberation of the capital by the Americans in a battle that destroyed much of the city. "When they came, this tall, sunburned American came to me and said, 'Now don't lorget, it was the 1st Cavalry from Texas that liberated this area," she recalls. "So I never

After the war, she was brought by American friends of her parents to the United States, where she later met Sotto Roxas, a young Filipi-no who was studying at Fordham University in New York. A brilliant economic planner and anker, Sixto, along with his new wife, returned to the Philippines, where he helped write the country's first comprehensive land-reform act and headed economic planning for President Diosdado Macapagal, who preceded Mr. Marcos in the early 1960s.

When Mr. Marcos was elected in 1965, Mr. Roxas declined to join the new cabinet, and instead founded the country's first invest bank, Bancom Development Corp. Still, the Roxases remained close to the center of power, and were frequent visitors at Malacanang Pal-

tural restoration. For a time, she was invited to country where the middle class started looking join Mrs. Marcos almost every week to work on at corprojects such as the establishment of the ballet Mr

nies" - became a source of increasingly deep frustration to families such as the Roxa

national Airport. Just as witnessing the Bataan Death March had jolted her parents into action during World War II, Mr. Aquino's death

served as a catalyst for Mrs. Roxas's active involvement against the Marcos government.

Uotil that moment, she says, she had suppressed her growing feelings of discontent and distaste for the autocratic rule of Mr. Marcos and the extravasance and investitivity of his and the extravagance and insensitivity of his wife. "When Ninoy wis killed," she says, using the nickname by which Mr. Aquino is known, "it was like something exploding inside a lot of people - in me, too - and it was such a relief. You don't realize how bottled up you are."

A supervisor at the bank that employs one of Mrs. Roxas's sons says he believes that the shock Mr. Aquino's death produced on the middle class may be decisive for the country's future. "To me, what is critical is basically the middle class," said the supervisor, Alexis C. San m, an assistant vice president at Far East Bank & Trust Co.

"Many of the rural folk are malnourished, but they are used to this and they are not so criti-cal," he said. "This is the first time I've seen the ace.

Mrs. Roxas became a socialite and activist.

She was chairman of the board of the Rallet at events in other countries, when the middle Philippines, an organizer of the Madrigal Sing-ers of the Philippines and a leader in architec-of people are citing Nicaragua, another Catholic

> Mrs. Roxas says the growth of communism in herself nevertheless as "perhaps a little bit more . fail,

When Mr. Marcos, his statutory term of of- left of center than most of the middle class." She fice nearing an end, imposed martial law in added: "I don't think I've changed my mind on 1972, the Roxases were vocal in their support, the basic things. I can see the reasonableness of boping, as Mrs. Roxas now says, that "maybe some of the issues the left is pushing, of poverty, things would get done; maybe this is what the Philippines needs, a benevolent dictator."

But her distillusionment with martial law set radical left — thinking people, intelligent people.

anchors of the Philippines' establish-The country's worsening economic situation ment also has been shifting toward accompounded existing dissatisfaction with the tivism. The liberation theology that has led Marcos regime, and the corruption of Mr. Marmany Latin American priests to join radical cos and his close friends - known as the "cro- causes has captured the imagination of many young Filipino priests and nuns. Two of Ma-nila's exclusive convent schools have in the last The turning point in Mrs. Roxas's political few years become socially committed, and now evolution, and that of many of her countrymen, often send their students, the daughters of midwas the killing of Mr. Aquino at Manila Interdhe-class women such as Mrs. Roxas, to sit-ins dle-class women such as Mrs. Roxas, to sit-ins and strikes instead of ballet class.

Through nearly a half-century in which the Philippines was an American colony, and even more so in the postwar years of independence after American troops saved the country from the Japanese, the American image, as one of Mrs. Roxas's iriends puts it, "has been associated with democracy, freedom, the good things in life." It is all the more sad, therefore, the friend said, to see the growing disenchantment with American policy that has led people such as Mrs. Roxas to demonstrate at the embassy.

The United States in Vietnam did not realize the valid nationalist aspirations of the people," she said, "and I think that is happening here. They only think in terms of power politics, and we are being squeezed. If we are pushed to the wall and something happens here, I hope the Americans will understand and not create another Nicaragna situation.

Mrs. Roras and others like her say that Mr. Marcos holds in his hands the machinery of victory. Of a total of 90,000 registered voters in the Santa Ana area, a local organizer told her, Mr. Marcoe's New Society Movement has pad-ded election rolls with 17,000 fraudulent names. The election campaign has focused the disaf-fection and resentment that has pushed the middle class to activism. In conversations late at night, Mrs. Roxas and her friends agree that

their struggle for fair elections and for a change of government is a desperately long shot. But they say they have no choice except to try. And mpany and the restoration of the old walled the Philippines worries her, but she describes few seem to know where they will turn if they

Anti-Nuclear Dutch Plan a Nuclear Future

By Roland de Ligny The Associated Press

HE HAGUE - Although a 30-month study shows that the Dutch do not want any more nuclear power plants, the government has chosen prospective sites for two or three more reactors.

The decision Jan. 24 to use ouclear plants to guarantee power for the oext century reflects the decline of the nnce-strident anti-ouclear lobby

ter Rund Lubbers claims that without a guaran-ment also promoted the government survey.

nuclear energy development.

The Netherlands already has twn nuclear power plans io operation. They were built in the late 1960s and early 1970s.

The decision to build more reactors followed the release in late 1984 of a survey on the future of nuclear power in the Netherlands. The survey revealed that the Dutch did not want additional nuclear plants and would not need them if adequate research were performed on alterna-

The government, however, maintained that alternative energy sources could not fill the nation's projected energy needs because research in that area was still in the embryonic

Last month, Mr. Lubbers proposed the con-struction of a plant in the southwestern town of Borssele, another near Delfzijl on the northernmost tip of the country, and if need be, a third near Rotterdam, the economic powerhouse of the Netherlands.

The government's decision to ignore the survey findings was viewed as a slap in the face of the Dutch anti-nuclear-power lobby.

in the Netherlands. And the government, by ignoring the conclusions of its own study, has underlined a never-ending conflict over how to maintain the nation's quality of life.

Opponents of ouclear power, buoyed by a wave of environmental concern that swept Western Europe in the 1970s, had forced the maintain the nation's quality of life. Opponents of ouclear power, buoyed by a The center-right government of Prime Minisfor more than a decade. The anti-ouclear move-

lose Members its important industrial sector to countries, like erlands, which already is battling pollution from France, that have been less restrained about industrial development of the 1950s and 1960s, would be further contaminated by the construction of new reactors.

> "Instead, the government gives the go-ahead without having properly assessed the risks attached to ouclear power, and without having any insight as to what to do with the nuclear waste," said Lucas Reijnders of the Nature and Environment Foundation, a privately funded organization that maintains the anti-nuclear-

The government maintains that the ouclear waste problem will be solved by the time any new power plants begin operating.

All of the nuclear waste from Dutch power plants and medical facilities has been stored

Parliament approved the government's decision to construct additional nuclear plants.

near the coastal town of Velsen since the government banned ocean dumping in 1983.

The idea that the waste problem won't exist any more by the end of the century is at least naive," said Mr. Reijnders. "We think it won't be solved easily."

He accused the government of "presenting a rosy picture to promote the idea of unlimited onomic growth."

The two power plants oow operating, situated near Borssele and oear the central Dutch village of Dodewaard, provide only a small fraction of Dutch electricity, which comes mostly from oil, from gas or from coal-powered generators. The proposed plants, together with the two existing ones, are projected to supply about 40 percent of Dutch electricity needs by the year 2000.

The government, along with business interests, has noted repeatedly that Dutch natural gas reserves, which currently are estimated at about 2.8 trillion cubic yards (2.1 trillion cubic meters) are expected to run out in 45 years if the current level of use is maintained.

The government also wants to diversify energy sources and to reduce Dutch dependency on

The 1973 Arab oil embargo against the Netherlands, which was triggered by Dutch support for Israel in the Middle East war that year, led to highly unpopular gasoline rationing and bans on Sunday driving.

building the two nuclear power plants would be guilders (\$2.8 billion).

Prime Minister Raud Lubbers

better spent on research into alternative energy The anti-nuclear lobby agrees that diversifying is important, but maintains that funds for reactors are expected to cost about 7.6 billion

A Typical Swiss Village Thrives — in Wisconsin

By Charles Hillinger Los Angeles Times Service

TEW GLARUS, Wisconsin - "This town is a carbon copy of a Swiss village in the old country," said Jean Holzer, 64, over a foamy stein of Feldschoesshen beer at the Chalet Landhaus in this snow-covered southern Wisconsin community.

"It is the most typical Swiss village on Earth outside Switzerland," Mr. Holzer said. He ought to know. Mr. Holzer, the Swiss consul general for 14 Middle Western states, has

serving in posts throughout the world. He is now hased in Chicago.

To the Swiss in Switzerland, New Giarus,

population 1,683, is the best-known place in America. Swiss children learn about New Glarus in their history classes.

Small maps of the United States printed in Switzerland show a handful of cities; New York. Chicago, Seattle, San Francisco, Los Angeles, New Orleans and New Glarus.

New Glarus is where Swiss cheese got its start in the United States. The year was 1869. The cheese maker was Niklaus Gerber in his New Giarus Käsekutte, or cheese hut. Called Emmentaler in Switzerland, it is, of course, the cheese with the holes in the middle.
To this day, Green County, Wisconsin, where

New Glarus is situated, is the Swiss cheese capital of America. There are Swiss cheese factories on the outskirts of New Glarus, in Monroe, 16 miles (26 kilometers) to the south, and scattered throughout the county.

Strong bonds to Switzerland have persisted in

New Glarus. The town was founded Aug. 17, 1845. by 108 immigrants who traveled four months and more than 7,000 miles from their homes in Glarus canton, Switzerland.

Every year groups of Swiss people make pil-grimages to New Glarus, and every year New

Glarus's elementary and high school. New Glaran students enroll in Swiss schools in Glarus canton and other places in Switzerland and live with Swiss families.

IMES were tough in Europe in the mid-1840s, and extremely difficult in the Swiss canton of Glarus. It was the only time in the history of Switzerland that the gov ernment sponsored an emigration colony to another nation to help ease economic problems It was called Glarner Auswanderungsverein,

the Glamer Emigration Society.
Two scouts, Niklaus Durst and Fridolin Streiff, were sent ahead to find land in America for the Swiss colony. They made their way up the Mississippi River from St. Louis and found what they were looking for in the rolling hill country of southern Wisconsin. The land was cheap enough, \$1.25 an acre, with a good water supply. It was ideal for raising crops and dairy

A total of 1,983 men, women and children left Glarus canton for the long voyage across the Atlantic and the subsequent journey to their new home in a promised land. Only 108 made it to New Glarus. The others settled elsewhere in the New World or died on the way.

Land was cleared for crops, log cabins were erected. Dairy herds were started. The pioneers began their new life. They spoke Schweitzer Deutsch, the Swiss-

German dialect of the rural mile-high Alpine valley of their origin. It is a dialect spoken by the Swiss families of New Glarus to this day, along

with English When we visit Switzerland, people know immediately where we come from because of our dialect," said Dennis Streiff, 57. "The Swiss are fascinated by the way we talk

spoken in Glarus today,"

Colorado, California or other parts of the Unit-

Descendants of nearly all the original families continue to reside in or near New Glarus families with such names as Aebli, Babler, Becker, Disch, Durst, Figi, Hefty, Hosty, Klassy, Kundert, Legger, Schindler, Schmid, Stauffacher, Trumpi, Voegeli and Wild. Many Swiss families live in stardy farm-

houses more than a century old. Doris Streiff, 54, and her husband, Dean, 55, both fifthneration Swiss-Americans, live in an 1882

Mr. Streiff's great grandfather was Fridolin Streiff, one of the scouts sent ahead by the Swis government to find land in America for the colony. His grandfather was the first baby born

in the village.

Their daughter, Nancy Keegan, 22, spent a winter working and going to school in Underwasser, Switzerland. For years, Swiss children have lived with the Streiffs while attending

school in New Glarus. Many homes and nearly all the stores and public buildings in New Glarus are Swiss chalet architecture. Several homes have Schweitzer Deutsch sayings hand painted on the outside.

On one chalet are sayings that translate into: This house is where we love to see you come and hate to see you leave. This house is mine and is not mine. I go out and you come in. Tell me .. who will be the last one in The Upright Embroidery Factory manufac-

tures Swiss lace and embroideries. The 21-yearold Roger Bright Band performs each year in New Glarus and in Switzerland as well. The Edelweiss Stars, a group of two New

Glarus men and four women who have been yodeling and singing together for 35 years, per-form in Swiss clubs in the United States and

Gift shops are filled with Swiss items purchased by proprietors who go to Europe each year to replenish their supplies.

For 50 years, townspeople have produced Schiller's 1804 play, "Wilhelm Tell," in an outdoor amphitheater. It is performed twice in English and once in Schweitzer Deutsch every Labor Day weekend. The highlight of the production is Gessler the Tyrant's demand of Wilhelm Tell. "They mile these are made of wheeler Tell." They mile these the service of the helm Tell: "Thou wilt shoot an apple off the boy's head."

Each year 200 local people participate in the drama. The play is also presented annually in Interlaken and at Altdorf, Switzerland.

VERY summer busioneds of Swiss vaca-tioners come to New Glarus. "They would come here and stay in hotels and motels in Madison, 25 miles north of here," said Hans Lenzinger, 38, a ski instructor who emi-grated from Underwasser, Switzerland, when he was 20.

"From the moment I read about New Glarus in my history class in school I planned some day to come here," he said.

Five years ago, Mr. Lenzinger and three other local men built the 44-room Chalet Landhaus Swiss country inn so that visitors could stay in New Glanus.

The Swiss Historical Museum occupies a square block of the village. In it are a dozen historical structures, including a replica of the 1849 log cabin Swiss church. In the center of the historic village is the Hall

of History, designed by an architect from Gla-rus, Switzerland. The building is filled with photo displays and artifacts presented by the people of Glarus canton to New Glarus.

The Swiss Americans of New Glarus keep their family records up to date in the Rathauses, or canton courthouses, in Switzerland.
"Here I am," Dennis Streiff noted, "four

penerations removed from Switzerland, yet this past summer my wife and I went to Switzerland in a slow and singing fashion," he said. "Our bringing the latest information of our family to dialect is a throwback to earlier times. It is a be added to our records there. We registered all different dialect from the Schweitzer Deutsch our grandchildren who are six generations removed from Switzerland."

He said many American citizens in New Gla-INCE its founding 140 years ago, there rus have dual citizenship. They do that so they has been a steady trickle of Swiss people don't need work permits to work in Switzerland emigrating to New Glarus. Many remain for brief or long periods of time. It eliminates a in Green County for the rest of their lives. Some lot of government red tape when visiting Swit-move to other parts of Wisconsin, to Illinois, zerland if you have dual citizenship."

Swiss Sanctuary Movement Pits Churches Against State

By Lisa Schlein international ilerald Tribune

Y ENEVA — "I didn't choose in come to Switzerland. I came (nr political rea-sons. I'm afraid to return home. There's no guarantee that I would remain free if I'm deported, so I sought refuge in the church." Simba N. says he fled to Switzerland from Zaire in 1983 after he was harassed and arrested He is single, 25 years ald and one of 20 asylumseekers from Zaire. Turkey and Chile who, threatened with expulsion from Switzerland sought refuge in the parish of Saint Amédée in

"Since my demand for asylum was rejected," he said. "I have been living in a state of anxiety. My hope diminishes every day."

Saint Amedee is one of a growing number of churches to Switzerland that are pitting their moral authority against the legal authority of the state by offering sanctuary to asylum-seekers caught in precarious situations.

In a generally conservative, law-abiding country, this incipient sanctuary movement is a remarkable development. It is regarded as an open challenge to a government that is becoming ever more restrictive in its asylum policy.

The sanctuary movement first appeared on the Swiss scene in September when a small narish in Seebach oear Zurich sheltered 52 Chileans about to be expelled from the country. The Chileans, joined by 20 Swiss citizens, went on a three-week hunger strike that succeeded in eliciting a promise from the authorities that they would not be repairiated. Still under orders to leave Switzerland, however, they remain in the parish pending a solution to their problem. Last fall, a succession of events created panic

among asylum-seekers and mobilized individuals, churches and political and humanitarian organizations. The government, which had been dragging its feet in dealing with asylum requests, suddenly

began issuing rejections wholesale. "The federal government tightened the vise," said Bruno Clement, a labor leader and sanctuary activist. He said that whereas the canton of Vand previously had one or two visa rejections a SOS-Asile, a Lausanne-based organization is month, "now we have five or six refusals a the forefrom of the sanctuary movement, said

Early in November, in a surprise operation that came to be known as "Black Autumn," 59 that came to be known as "Black Autumn," 59

Zaircans were rounded up, manacled and put aboard a plane for Kinshasa.

"Switzerland has been brought into the larger present their petitions for asylum personally international scene," she said. "We're used to dealing with problems from afar, and suddenly dealing with problems from afar, and suddenly about the larger present their petitions for asylum personally before federal adjudicators. Now, asylum seekers will have recourse only to one face-to-face must go before the love of the law."

The expulsing of the 59 Zaireans was incredihle," said Yves Brutsch, a spokesman Ior the refugees at the Protestant Social Center in Geneva. "This was the first time that a massive deportation of this nature had ever occurred."

A leader of the sanctuary movement, the Reverend Claude Ducarroz of Notre Dame church in Lausanne, said, "We asked for a truce with the government before we opened the sancnd the government refused." That refusal, be added, "provoked an agonizing situation for people who could have been arrested the following day.

The sanctuary movement is defined clearly. along regional lines and is coordinated only

loosely at the national level. Thus far, five par-

ishes in Switzerland have sheltered asylum-seek-

ers. But activists say that 100 to 200 churches are

prepared to lend their services if the oced arises.

requests and left Switzerland. About 21,000 requests for asylum are pending. A popular perception is that the country is being overrun by immigrants. But government statistics show that asylum-seekers represent only 0.5 percent of Switzerland's 6.5 million

The tremendous backlog of cases has created hardships for applicants, who often have to wait years for a decision. To speed the process, the parliament has increased the number of examiners. Bot it is generally agreed that these new posts still fall far short of what is needed. A recent revision of Switzerland's asylum law is intended to simplify and accelerate the procedure, but not necessarily to the applicants' ad-vantage. Jorg Kistler, chief of information at the Justice and Police Department, was straig

new asylum law is to make it less attractive for persons to seek asylum in Switzerland." The government contends that 80 percent of those seeking asylum have come for economic,

Dow Hits 1,600, Then Retreats NEW YORK - The New York Stock Ex-change fell back from record highs Tuesday in

the ninth heaviest volume day in its history. At one point, the Dow Jones industrial average rose above 1,600 before retreating.

After a day of volatile trading, the Dow finished with a modest loss of 1.04 points to 1,593.23. Declines beat advances 865-801. Volume was

175.7 million shares, up from 145.3 million on Monday

Falling crude oil prices persisted as a market factor through the day, though participants shifted their emphasis from the beneficial asoects of the trend to its more worrisome effects. Investors gave the disinflationary impact of lower oil prices part of the credit for pushing the market to new highs Monday and for an early boost Tuesday.

But the impact of cheaper crude on the ability

of some oil-dependent nations to repay debts to U.S. banks gave the market B case of midafternoon jitters. Profit-taking ensued, pushing the market back from its new highs. "Clearly the market has had a major advance," said Jack Conlon of E.F. Hutton. "In-

vestors have decided to lock in profits for the first quarter."
Mr. Conlon and other analysts said the market faced the "distinct possibility" of a correction to 1,500 or 1,525 on the Dow.

"The market is vulnerable to a correction that could bring it back to 1500," said Harry Villec of Sutro & Co. in San Francisco. "The market has come too far too fast, lots of profits have been made and people are starting to take Sis. Closs

Toronto Stocks Plunge

TORONTO - The Toronto Stock Exchange, reeling from the fall in world oil prices, sustained on Tuesday its biggest sin-gle-day loss since Sept. 25, 1981. Trading

The composite index fell 60.75 to 2,782.15 on volume of 24.3 million shares. Total on volume of 24.3 million shares. Total stock value declined by 4.6 billion Canadian dollars (\$3.18 billion). Losses led gains by more than three-to-one, with sharpest drops among oil, bank and gold shares.

"The whole thing is rather silly," said Gino Blink, an analyst with Burgess Graham Securities Ltd., calling the decline an emotional chain reaction to the slide in oil.

emotional chain reaction to the slide in oil

Exxon (ex-dividend) was the most active issue, falling 1% to 49%.

AT&T followed, easing 1/4 to 211/2.

R.J. Reynolds (ex-dividend) was next, gain-ing % to close at 34. Other oil issues also weakened as crude oil futures moved sharply lower on the New York Mercantile Exchange. Chevron was off 1½ to 34, Texaco was down 1¼ to 26%, Pennzoil lost 1¼ to 64%, Mobil (ex-dividend) was off ½ to 28½, Atlantic Richfield was down 1½ to 51 and Sohio lost 1/2 to 461/2.

The American Stock Exchange index lost 2.78 to 240.30. The price of an average share lost 15 cents. Declines beat advances 361-248 among the 835 issues traded.

INTERNATIONAL MANAGER

European Firms Are Wary About Helping Alcoholics

By SHERRY BUCHANAN

ARIS — Thanks to employee assistance programs created to help alcoholic executives, U.S. corporate taboos about the condition are subsiding. But in Europe, few companies have similar programs. Managements tend to feel more comfortable taking a "none of our business" attitude, International Herald Tribune

and individual executives seem to agree.

In European corporate cultures, "alcoholism is a moralistic thing," says Jim Ditzler, an American specialist psychologist working in Britain. "If you are an alcoholic you are a bad person,"

not a sick or an ill person. Many supervisors fear a reaction to what employees may interpret as interference in their private lives. A British boss told one of his semior managers, "I think you have a drinking problem." The manager replied, "Fine, I'm quit-ting at 5 P.M. today," which are did. But he called back the "Ext day at 10 A.M. to say he wanted help, and is now in a

Supervisors fear executives may resent intrusion into their private lives.

On the corporate side, few medical and psychological teams have comprehensive programs to deal with executive alcoholism. In contrast, U.S. employee-assistance programs identify the condition, persuade the patient to seek treatment and pay for treatment at a disintoxication center that can last a month. On the executive's return to work, he is counseled about self-help groups, such as Alcoholics Anonymous.

"At Philips, alcohol problems and treatment are rather sup-pressed," says a psychologist with the Dutch electronics group's medical team. "We don't have a companywide alcoholism program and that's not accidental. It is part of the corporate culture. Alcohol problems are tricky to talk about. I have tried to get management interested in the problem. But management keeps asking me if it is really that crucial."

P SYCHOLOGISTS and occupational doctors argue that there are several reasons for the relative lack of corporate interest in curing alcoholic executives. For some companies, it is a matter best left to the discretion of the individual.

"A lot of British companies don't feel it is their responsibility. It is considered a private thing," says Mr. Ditzler, who was trained at Hazelden in Center City, Minnesota, a treatment center that advocates total abstinence after disintoxication, and who founded Farm Place disintoxication clinic in Surrey, En-

gland, 10 years ago.

He added, "The attitude is to give the executive a golden handshake that he can then drink away." In France, the country of good wines, alcoholism is considered a bum's disease or a disease of Anglo-Saxon people, who the

French view as drinkers aiming at quantity, not quality.

"Alcohol is not considered a toxic substance," says Françoise
Demathicu, an administrator at the Institute for Scientific Research on Beverages, a Paris-based industry association that finances research on alcoholism. "The problem then is to estimate how much a person drinks. That is taboo. You can't ask a French company to be responsible for that."

Some companies that don't have programs to deal with alcoholics do take the trouble to refer top executives to treatment which is usually covered to some extent by government or private

"We haven't got an official corporate policy. But we would endeavor to help," says Howard Slack, director of human re-sources at Metal Box PLC, the British diversified packaging group, who recently referred an alcoholic executive for treatment.

"It would probably depend on the level of the individual. If it was a senior person that is important to us, then the company would probably refer him for treatment and pay for it."

Bell Seeks 20% More Of BHP

Holmes à Court Bids \$1.3 Billion

Compiled by Our Staff From Disput PERTH, Australia - Robert Holmes à Court, the Australian financier, launched a new assault Tuesday on Broken Hill Pty. by offering to acquire a 20-percent stake in the multinational resource company for an indicated price of 1.9 billion Australian dollars

(about \$1.3 billion).
Mr. Holmes à Court's Bell Resources Co. said it would offer 7.70 Australian dollars a share or one Bell Resource share plus 2.50 dol-lars for 250 million BHP shares.

BHP, the country's leading oil and steel producer, promptly re-jected the bid, Mr. Holmes a Court's third ron at the company. "The board of directors of BHP. are unanimous that the proposed offer is insincere," BHP's chair-man, Sir James Balderstone, said.

Their view is that it is worthy of Mr. Hohnes à Court, through his Bell Group and Bell Resources companies, already holds around 19 percent of BHP. The new bid, if successful, would give him nearly 40 percent, worth almost 3.5 billion

While BHP directors unanimously rejected the bid, analysts said the bid appeared to be genu-

BHP shares traded wildly on the nation's stock exchanges, leaping 30 cents, to 7.50 dollars, after the bid. They later fell back to 7.40

The volatility stemmed from conditions attached to the bid, which included no change to do-mestic oil prices on which BHP depends for most of its profits, and no change to takeover laws, cur-rently being studied by lawmakers. Analysts said they expected Mr. Holmes à Court to drop some of

the conditions from the offer. Mr. Holmes à Court's move comes only weeks after BHP an-nounced record six-month profits

of 574.4 million dollars. The financier has said that he

Ford May Buy **Austin Rover** Car Unit of BL

LONDON - Ford Motor Co. is negotiating a possible purchase of the Austin Rover cars division of state-owned BL PLC, industry sources said Tuesday.

Purchase of the unit, the only large British-owned automaker, would increase Ford's share in the British market to 44 percent.

Spokesmen for Ford, Austin Rover Group PLC and Britain's Department of Trade and Industry confirmed that discussions were under way between the two compa-nies. The spokesmen declined to give details, saying the talks were "at a preliminary stage."

On Monday, the Conservative government of Prime Minister Margaret Thatcher amounced that General Motors Corp. was seriously discussing the purchase of BL's commercial vehicles division, which makes the Land Rover, Range Rover and Leyland trucks.

The opposition Labor Party assailed the idea of a sale to GM, and on Tuesday Mrs. Thatcher de-fended it before the House of Commons. "British Leyland will have a better future if it's in a position not to make a continued demand on the taxpayer," she said.

She said no one could doubt the government's commitment to BL, after it had put £2 billion into the

worth of credit guarantees.
Officials said the possible sale of

BL units to U.S. companies would be debated in Parliament on Wednesday, at Labor's request. Analysts said that an Austin Rover purchase would be a good move for Ford, which already has a market through its Ford Motor Co. Ltd. subsidiary. The other major car manufacturer in Britain, Vaux-

hall, is owned by GM. "Although Austin Rover has not been tremendously successful, they present a cheaper way for Ford to get more U.K. production," said Bob Barber, an analyst with Phillips & Drew.

In 1984, Austin Rover had a before-tax operating loss of £26 million (\$36 million at current rates), although for the first half of 1985 it showed a £600,000 profit.

Most analysts agree that a sale of Austin Rover to Ford would mean

some loss of jobs.

BL, formerly British Leyland, has been a nationalized company since 1974. Now, the government plans to sell as many of its divisions as possible to private hands as part of the Conservatives' drive to denationalize a range of state-owned BL sold its Jaguar car division 18 months ago for £297 million.

Last year reports spread that the government was hoping to sell Austin Rover to Honda Motor Co.. which is producing the XX middle-range model with Austin Rover. Industry analysts said Tuesday that at present Honda did not appear to

be a serious suitor. The leader of the Labor Party. Neil Kinnock, called the proposed sale to GM of BL's commercial division "a further act of colonization in the British economy."

He added, "When British money has rightly gone into modernizing BL what possible excuse can there be for serving it up, gift-wrapped. to a foreign competitor?"

Earlier, Michael Heseltine, the

former defense secretary, warned in a speech to businessmen that there could be anti-American reaction in Britain if United Technologies Corp. and its partner Fiat

Will Testify Some European companies, such as Volvo AB, are exploring (Continued on Page 15, Col. 4) Against Tan Currency Rates

Agence France-Presse SINGAPORE — The financial director of the stricken Pan-Electric Industries Ltd. will give evidence against Tan Koon Swan, a prosecutor said Tuesday after the director pleaded guilty to criminal breach of trust.

Glen Knight, the public pros-ecutor, told a district court that Pan-EPs financial director, Tan Kok Liang, would be a prosecu-tion witness in the trial of Tan

Tan Koon Swan faces charges of abetting criminal breach of trust.

Tan Kok Liang had carlier pleaded guilty in a magistrate's court to two counts of criminal breach of trust involving 54,600 Singapore dollars (\$25,600) of Pan-El subsidiary funds. The district court deferred sentencing until Wednesday and re-manded Tan Kok Liang in cus-

Tan Koon Swan is free on bail of 19 million dollars pend-ing the hearing of his case on May 15. He had no direct interest in Pan-El but had a substantial stake in it through one of his stable of companies, Sigma In-

Pan-Ei, a Singapore-based company, had interests in manufacturing, properties, hotel and salvage operations. It ran up debts of more than 220 million dollars and the company was put into receivership.

Shoppers in Budapest at one of Skala Co-Op's 66 stores.

from October, the Economics Min-istry said Tuesday.

The ministry had originally estimated that output had fallen 0.2 percent in November.

In a separate report, the federal government's Labor Office in Nuremberg said that unemployment, not adjusted for seasonal factors, rose to 2.59 million in January from 2.35 million in December. The total represented 10.4 percent of the work force, against 9.4 percent in

December.
Seasonally adjusted unemployment, however, fell slightly to 2.28 million from 2.29 million in De-

The Economics Ministry said that the index of industrial production, base 1980, fell to a provisional 103.2 in December from 105.7 in November. In October it stood at

Production was 1.7 percent higher than in December 1984.

The ministry said the latest figures were probably distorted by the fact that more companies than nor-mal-had interrupted production over the Christmas and New Year's

holidays. reports from companies on current production, production plans and exports, the ministry added.

The drop in production contrast-ed with other available December indicators, such as capacity use and

Production by manufacturers fell by 4 percent in December from November. But output in the con-

Options United Press International

DENVER — Manville Corp. reported Tuesday a cet loss of \$45.1 million for 1985 after a profit of \$77.2 million the previous year.

The company said the loss was due to a previously announced after-tax charge of \$120.1 million that it took against third-quarter earnings, reflecting the sale and closure of some operations. 1255555 Jun 100 0.66 0.43 0.75 0.75 1.18 1.34 1.76 1.47 2.46 2.44 245 227 124 124 0.57 Mgr 608 629 671 151 241

MIAMI — Virgin Atlantic

Airlines, the carrier founded by

a British entertainment entre-

preneur, plans to begin flights

between Miami and London on

For one month the one-way

fare will be \$199, the lowest on

the market. The fare will in-

crease to \$299 on May 19, a

spokeswoman said, and will

change again on May 31.

The higher fares are roughly competitive with the lowest

fares offered by Pan American

World Airways and Eastern Airlines, which already fly be-tween Miami and London.

The spokeswoman said the

new route represents Virgin's

first expansion since Richard Bransen started operations in

June 1984 with one flight a day

between London and Newark.

"Only those able to survive in the United States can remain competitive on the world market longterm," Karlheinz Kaske, Siemens's chairman, said.

Having been criticized by indusdy analysts for failing to establish n larger presence in the huge U.S. market for electrical and electronic products, the giant West German electrical group is poised to test its muscle further across the Atlanue.

Coping with marginal losses at its growing U.S. operations is a small price to pay for access and market share in the United States, the largest "homogenous" market for electronic products, Mr. Kaske said Monday at a press conference.

Daewoo to Build Nissan Vans

United Press International TOKYO - Nissan Motor Co. said Tuesday that it had signed an agreement with Daewoo Motor Co. for production in South Korea of Siemens Energy & Automation. Nissan's small commercial van, the Vanette. Production is to start in July 1987 at an annual rate of 17,000 units.

suez 97 (Cop)

ting its compass on the United U.S. investment spending would rise sharply, to 650 million DM fiscal year, ending Sept. 30. He did past four years by 35 percent, as measured in Deutsche marks, and year. The 650 million DM, he said. does not include funds for a planned joint venture with GTE

> equipment, a project expected to have initial annual sales of more than 2 billion DM.

Siemens officials hinted that the group remains in the market for e big U.S. acquisition, having failed last year to land Allen-Bradley Co., the factory-automation group, with an estimated \$1.5-hillion bid. Rockwell International succeeded in buying Allen-Bradley in a closed bid for about \$1.65 billion.

Company executives said that Mr. Kaske has been shuttling back and forth to the United States prospecting for acquisitions and over-Siemens Energy & Automation.

Siemens' fiscal 1985 U.S. sales of about \$1.8 billion accounted for 10 the year, Siemens hopes to mainpercent of worldwide sales, with both the percentage and the absoon sales, Mr. Kaske said.

His comments were embargoed until Tuesday.

Mr. Kaske said that Siemens's lute figure expected to rise this year in dollar terms but possibly not rising appreciably when translated mto Deutsche marks.

Mr. Kaske said that U.S. sales on (about \$270 million) in the current average have increased during the

A 151-million-DM loss at Siemens-Allis last year contributed to Corp. of the United States in digi-tal telecommunications switching a 75-million-DM loss at Siemens's overall U.S. operations in fiscal 1985, after a 27-million-DM profit the year before. But the loss at its U.S. operations, called Siemens Capital Corp., should shrink significantly this year, Mr. Kaske said.

Meantime, Siemens expects its steady growth in other world markets to continue space. Mr. Kaske pointed out, however, that the absence of major payments for nucle-ar-power-plant installations this year would mean an 8-percent drop in world group sales, to about 50 billion Deutsche marks (\$20.3 billion) in fiscal 1986, from 54.5 billion billion between 1986, from 54.5 billion bil lion DM in 1984/85.

Mr. Bransen owns Virgin Re-As previously reported, Siemens cords in London. worldwide net profit surged 43 per-cent in fiscal 1985, to 1.53 billion DM from 1.07 billion DM. Despite The spokeswoman said the carrier has one Boeing 747 and signed a five-year lease for a second jumbo jet from Boeing the projected decline in sales for to fly the new route.

Myers.

President of Toshiba Corp. Virgin Atlantic **Expects Lower Net in Year** To Fly Between Los Angeles Times Service Miami, London

TOKYO - Toshiba Corp., the big electronics combine, will report lower net income this fiscal year, partly because of a global slump in Shoichi Saba, the company's president. But he said that the company will increase production capacity for its new 1-megabit chips to one

million units a month by April.

The 67-year-old Mr. Saba, who will assume the post of chairman April 1, said in an interview Monday that Toshiba's consolidated net sales will amount to about \$16.5 billion in the fiscal year ending March 31, nearly unchanged. Net income, however, is "likely to decline," he added.

Mr. Saba said that, in Novempany in the world to begin mass production of 1-megabit dynamic random access memory chips.

It was only a year ago that To-Hitachi and Fujitsu - achieved a quarter the storage capacity of the 1-megabit chip.

Tsuyoshi Kawanishi, Toshiba's director for semiconductors, said the company's sales of chips will fall by \$575 million, to \$1.9 hillion, for the fiscal year. Mr. Saba. howsemiconductor sales, according to ever, predicted that the global semiconductor industry will enjoy a "full-fledged recovery" this year and added: "We remain committed to a positive, forward-looking

> Of the plan to increase capacity for the new 1-megabit chip to one million units a month, Mr. Saba said: "We believe this represents not a shift to a new generation of memory devices, but rather an additional option for customers." He predicted that mass produc-

semiconductor policy."

tion of the 1-megabit chip will spur development of new products.

When asked about American ber, Toshiba became the first comare dumping chips at prices below cost in the U.S. market, Mr. Saba said a long-range solution to the problem will have to be found in shiba and each of Japan's three more overseas manufacturing hy other giant chip makers — NEC. Japanese companies and more joint ventures in semiconductor research monthly production capacities of and development with foreign on units a month for the companies. He denied that To-256-kilobit DRAM, which has only shiba, which huilt six new semiconductor factories in 1984, had overinvested in production capacity.

closed Monday.

The Ways of the West In Hungarian Stores

(Continued from Page 11) the producers, setting up its own wholesale organization, arranging stores. exclusive contracts with some facnist countries and eventually

negotinting arrangements with

West European suppliers. To get good help, Mr. Demjan paid his employees 25 percent more than the average state wage, hired young people who wanted to work and fired those that did not. Employees receive a premium based on performance, too.

Within a year after opening in 1976, Mr. Demjan said, the first Skala department store recorded twice the average sales than its government competitors of the same size. Within three years, the group began huilding new outlets and adapting old stores owned by consumer cooperatives to form a network. Now it's expanding into production, buying defunct factories for little and turning them around to make goods at lower cost.

Last year it also created Skala World Trade, which aims for the equivalent of \$300 million to \$500 million in revenues by 1990, and after three tries it won an unusually liberal foreign-trade license.

"We asked the [Foreign Trade] Ministry to regulate what we cannot do - not to regulate what we are allowed to do," explained Mi-haly Muszbek, 31. Skala's financial director and Mr. Demjan's righthand man.

pay \$15 million in cash to Syntex, e plant in Marysville, Ohio, about -Poulenc Pharmaceutics. had California-based drug maker, for their attitudes toward unions and bought U.S, Ethicals, a company Skala Co-op is structured differently from its government-owned competition. Mr. Muszbek said he was talking tories, exchanging items with de- to a Swiss stores group, which may partment stores in other Commu-offer Skala an equity stake in exchange for a stake in Skala Metro. He declined to name the group.

Skala also sent a team to the United States to talk about possihle countertrade arrangements with Sears, Roebuck & Co. and K mart Corp. The company would like to import calculators, computers, color televisions and other products in exchange for Hungarian freezers, hand tools, pumps and other equipment, an executive in Skala's trading division said. Mr. Muszbek said, Skala sees "a real chance to open a K mart department store in Hungary.

Reached in Troy, Michigan, K mart Stores' group president, Nor-man Milley, thoroughly disagreed: "It's an Iron Curtain country. It operates under a intally different system. It's a very complicated prospokesman for Sears World Trade said it was not interested in countertrade arrangements with Skala.

But Mr. Demjan has managed to get his way before. Much of Skala's success has come from his persis-tence and skill in turning Hungary's liberal economic climate to the group's advantage. Now he's trying to understand the American business mentality and has hired a Hungarian graduate of Indiana University's master of business administration program to coordinate Skala's new management-training course - another first, he said, for the country.

"In Hungary, we have to concentrate our means and our efforts to work more efficiently," he said. This is the objective; to participate in the world market not according to Hungarian standards. hut international standards."

BP Shuffles Managers In Tokyo, Lisbon Offices

By Brenda Erdmann anonal Herold Tribune LONDON — British Petroleum Co. has made top-level management changes in its Tokyo and Lis-

In Tokyo, BP has named Peter J. Bryers managing director of BP Far East Ltd. and BP Japan Trading Ltd. He will take up his new Test Feb. 17 and will succeed Ted Williams, who is to retire.

Mr. Bryers turns over his duties as chief executive of BP in Portugal and as managing director of Companhia Portuguesa Dospetroleos BP to B.P. Hughes.

Mr. Haghes moves to Lisbon from London, where he will be manager, retail, in the oil-strategy and marketing department of BP

Australia & New Zealand Banking Group Ltd. has opened a branch of the Geneva branch. in Frankfurt and named Geoffrey Chantler and Holger von Paucker joint general managers. Mr. Chantler has represented Grindlays Bank in West Germany since 1976 and Mr. von Paucker most re-actly was a member of the board of management of National Bank

The new branch, the first to be opened in West Germany by an Australian bank, replaces the representative offices of ANZ, opened in Frankfurt in 1984, and of Grindlays Bank, opened in Düsseldorf in

Black & Decker Corp., the U.S.based maker of power tools and household appliances, has named Roger H. Thomas as group vice president, Eastern Hemisphere, responsible for Europe, Asia, Australasia and Africa. He succeeds Gunther Cott, who has left the company, Mr. Thomas will continue to be based in Slough, near London, and, for the time being, will continue as head of Black & Deck-

er's U.K. operations.

>2Wako Securities Co. of Tokyo by Masaoki Nakata, who was with Wako in London.

Lummus Heat Transfer Systems, which is based in Rijswijk, near quisitions. The Hague, said Uwe Rathje had ing apart.

General Motors Reshuffles Top moved up from the No. 2 post to become the company's president. He succeeds A.J.O. (Jaap) van

Management The Associated Press

DETROIT - General Motors Corp. said Monday that it has reorganized its top management, the same day it reported an II-percent decline in net profit for 1985.

The changes, which included the naming of a new president of GM's Saturn small-car subsidiary, represented "a prelude to further reorganization" within the world's No. 1 automaker, an industry analyst said. Alexander A. Cunningl

executive vice president for North American automotive operations, was placed on imnediate disability leave followed by retirement. Lloyd E. Reuss, formerly vice president and head of the Chevrolet-Pon-

tiac-GM of Canada group, suc-ceeded Mr. Cunningham. Robert C. Stempel, formerly in charge of the Buck-Oldsmo-bile-Cadillac group, was pro-moted to executive vice president in charge of the truck and

bus and overseas groups. He was succeeded by William E. Hogland, the Saturn Corp. president, who was replaced by Richard G. LeFauve, former director of operations for Buick-Oldsmobile-Cadillac and general manufacturing manager of Chevrolet.

>
> The figures caught everyone out," one dealer said, "One reason the market moved ahead so fast was that everyone had psyched themselves up for bad news."
>
> Another trader noted that buy-

ing in the market was purely pro-fessional, however. "Retail clients Tuesday that markets should not are looking at the weakness of oil "speculate" on its continuing to prices, and the longer term consequences they could have for ster-

ling," he said. Government bonds closed with gains stretching to nearly a point in response to the

lo the primary market, attention again focused on currencies other than the dollar, dealers said. Canadian National Railways issued a 10-billion-yen bond paying 6½ per-cent over 10 years and priced at 101%. The issue was lead managed by Bank of Tokyo International Ltd.

In what traders said was almost certainly a related issue. Bank of Tokyo International also launched a 70-million-Canadian-dollar, 10year bond for Bank of Tokyo Ltd. paying 10% percent and priced at 101%. Traders noted that the two

sues had the same maturity date. Banque Paribas Capital Markets bought and exercised half of the warrants on an old \$100-million, 12%-percent issue due 1992 for the French national railway, SNCF. It then syndicated the back bond, a 124-percent issue also due in 1992. at a price of \$114.25. The issue was trading inside its fees of 1% percent at around 1121/2.

In the dollar-straight sector, American Medical International issued a \$75-million bond paying 91/2 percent over 7 years and priced at 101. The issue was quoted just inside the total 1%-percent fees.

THE MAN WHO MISTOOK HIS WIFE FOR A HAT: And Other Clinical Tales

By Oliver Sacks. 233 pages. \$15.95. Summit Books, 1230 Avenue of the Americas, New York, N. Y. 10020.

Reviewed by Michiko Kakurani

ONLY connect"—that resonant phrase from E. M. Forster's "Howard's End" echoes throughout this remarkable book by the neurologist Oliver Sacks, for the case studies presented here are all concerned with individuals, unable in conventional ways to connect with themselves or the world around them. Dr. P., the music teacher in the title tale. finds his visual and perceptual abilities so impaired that he mistakes his wife's head for R hat, and can identify a rose only as "a convo inted red form with a linear green attachment." Jimmie G., suffering from amnesia, loses three decades of his life —time, for him, has stopped in 1945 — and now lives wholly in the immediate present, unable to recall anything for more than a minute or two. And John and Michael, idiot savant twins, dwell in R mental landscape composed entirely of numbers: While unable to cope with the most amendane of daily tasks, they can matantly memorize numbers of 300 digits or ascertain the number of match-sticks in R box with a glance.

Blessed with deep reserves of compassion and a metaphysical mm of mind, Sacks writes of these patients not as scientific curiosities but as individuals, whose dilemmas — moral and spiritual, as well as psychological — are made as real and complex as the characters in a novel. Like a novelist, Sacks manages to sugeest what it must be like to be a young, robust woman overcome by a form of polynemitis that leaves her unable any longer to feel her. body, control her arms or legs. And he is as persuasive in conjuring up the twilight zone inhabited by an amnesiac, bereft of identity. who must compulsively invent fictional selves for himself and everyone he encounters.

As for the twins who used to communicate with one another entirely in numbers, they are eventually separated by doctors, who feel they can best lead normal lives on their own. But while they grow more adept at coping with ordinary matters, they also lose, as Sacks notes, "the chief joy and sense of their lives." For the sake of becoming quasi-independent and more socially acceptable, they have been deprived of the very thing that made them special, rather than merely defective.

In all too many instances, of course, neuro-logical abnormalities produce not inspiration, 2 but painful disorders that isolate the patient from the ebb and flow of life around him. And yet, as Sacks demonstrates, the "striving tr serve identity" remains so strong a driv that given a tittle encouragement from symp thetic doctors, even the most seemingly debi, tated patient often demonstrates an astoniing resilience. At the age of 60, a woman wh congenitally blind and afflicted with ceres palsy learns how to use her hands, and comes locally famous as a sculptor.

Sacks uses the case histories to illum complexities of the human mind and to: for a new, more humane medicine that integrate matters of physiology and psycl gy with those of the imagination and the

BRIDGE

By Alan Truscott

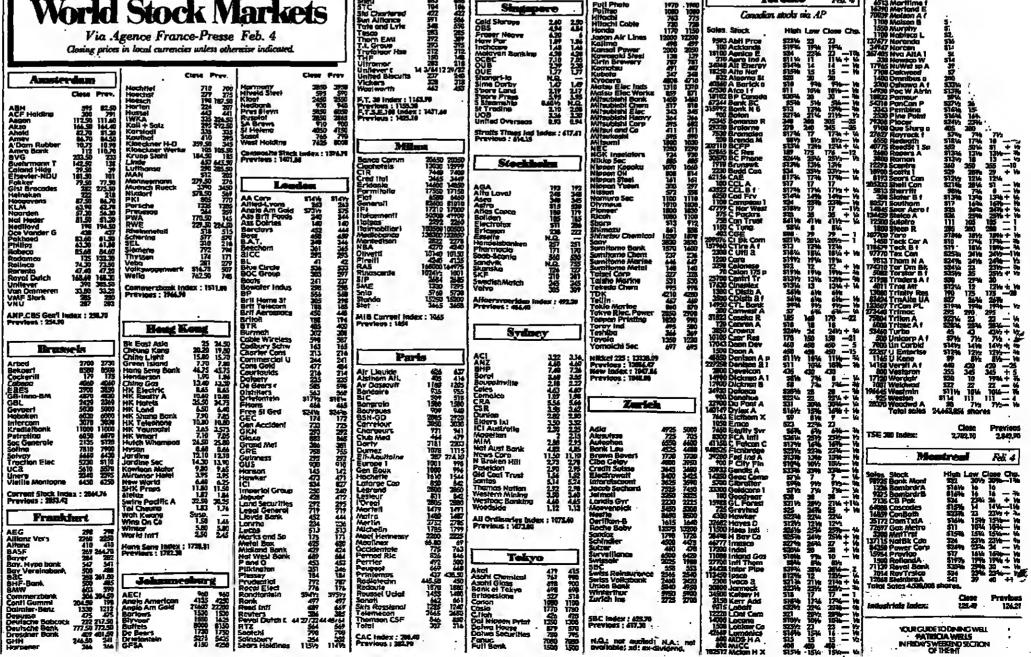

ON the diagramed deal, South received the opening lead of the club ten. The club suit was a threat, and the secret of success was to keep West from gaining the lead. South could expect to score four spade tricks, at least, one club and two tricks in each red snit. But he had to collect those nine tricks before the defense could take three chibs, a spade and a diamond.

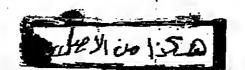

Thanks to the favorable diamond position this was not difficult, but South found the best series of plays to maximize his

chances. He played low from my, cashir cuttering 1 and led the diamond nine. This mond.

Court, but John Lucas put an end to that possibility.

With the Rockets trailing by 16 points in the third quarter, the veteran guard scored 19 points — including two 3-point jumpers - and handed out 12 assists to rally Hous-ton to a 104-102 National Basketball Association victory over its Midwest Division rival.

"I score when I have to score," Lucas said. "But I think the job Robert Reid and Rodney McCray did on Alex English won us the

Reid and McCray teamed to limit English, the league's top scorer, the third quarter before rallying to to 14 points — 16 below his averant \$1-77 deficit starting the fourth.

wa to Lan

problem was not that serious. "My knoe never was on a status of not was never not going to play."
"I thought the play of the game
was Reid's basket that tied it at 99-

99," said Lucas. "He told me that he wanted the ball and we got it to him." After Reid's 20-foot jumper. Akeem Olajuwoo boosted the Rockets for good on a three-point play with 57 seconds left to play. Houston's coach, Bill Fitch, said Olajuwon played with an injured hand. "He did pretty good for a one-handed man. He had a hard

ished with 23 points. The Rockets trailed by 57-46 at halftime as Ralph Sampson, Reid and Jim Petersen picked up three fouls apiece. Houston, which was outscored by 32-19 in the second quarter, fell behind by 15 early in

age. Playing with an injured knee, English missed his first seven shots and wound up 6-of-23 from the and wound up 6-of-23 from the pulled to within 3½ games, but we pulled it out and now we have the

SPORTS BRIEFS

McGuigan to Defend Against Cabrera

LONDON (UPI) — Barry McGnigan will defend his World Boxing Association featherweight title against Danilo Cabrera of the Dominican Republic in Dublin on February 15, it was announced Tuesday. Cabrera, 22, and with a 24-1-1 record, is ranked No. 6 by the WBA.

McGuigan, 24, was to have made the second defense of his title against Fernando Sosa, but the Argentine withdrew Friday after breaking a finger in training. McGuigan took the title from Panamanian Eusebao Pedroza last June and defended it against American Bernard Taylor in Religer in Second

OBSERVER

Nobody Seemed to Worry

By Russell Baker New YORK — Most of us rocket power was dangerous or came to believe it wasn't.

The disaster of the U.S. space shuttle would have been dreadful enough even if we had not forgotten that astronauts work close to the edges of death, but having our foolish delusions about rocketry destroyed in a flash of light turned the event into a national horror.

Afterward the official statements emphasized the government's determination to pursue the rocketry program despite such events. These ements were inevitable and sensible and made the sensible point that in this kind of work there will always be black days.

Unfortunately, this was a point about which most of us had not been reminded for a long time, least of all by NASA, whose publicrelations policy had encouraged the delusion that rocketry was now so safe that the shuttle was ready for

NASA was not alone in hilling the public. Newspapers and televi-sion helped. TV coverage wasn't always there anymore if a launch or a landing came at a commercially inconvenient hour. Newspapers began pushing the shuttle off page one, contributing to the impression that rocket travel was becoming

Well, it's hard for the press to keep covering, always with the same intensity, an event that begins to repeat itself uneventfully. We the public, with our ever-shrinking attention span making us crave an incessant supply of sensations that are new, new, new — we do not want another uneventful rocket story interrupting the soap opera.

In matters of news, the public usually connives in its own deception, then abuses the news industry afterward for not having prepared everybody against some surprise by providing stories that 99 percent of the public would have found too

boring to read. The public-relations policy of NASA, however, went beyond passive tolerance of a naive public view about rocketry. It pursued a policy that positively encouraged the delusion. When it announced it was ready to start carrying civilians

taste of the excitement, most of us probably assumed it meant the bugs had been ironed out of rocket

Looking back on it, it is curious that nobody was heard to ask why, since amateurs are never invited to go along for the ride when test pilots fly new airplanes, amateurs should be invited to ride the space shuttle. Shuttle crews are the space equivalent of test pilots; the fliers among them, in fact, are often test pilots; and private insurance companies, which are rarely deluded about anything, regard any astro-naut as an uninsurable risk.

What should always have been obvious — that the shuttle program involved human beings in extraordinary risks such as are normally undertaken only by the most highly trained technicians fully aware of the peril — was so thoroughly for-gotten that the first amateurs carried aloft were a senator and a

This tells us that NASA had ended by deceiving itself about the safety of rocket flight. No govern-ment bureaucracy drawing its mon-ey from the good will of Congress is going to invite a congressman to do anything that might conceivably be

Hindsight is marvelous. It makes it so obvious now that NASA should never have accepted Christa McAuliffe as its third amateur passenger. She was too much like every parent's daughter, every young child's mother, every student's ide-

If the dubious project for putting a teacher aboard had to be carried through, caution dictated perhaps an aging bachelor, a bit dry and aloof, someone, in fact, a bit more like a coogressman, just in case the insurance companies did turn out to be right about the odds and the NASA public-relations program

WYORK. When we did so abruptly discover how foolish we had been in our views about rocketry, it was the loss of McAuliffe, I suspect, that made the horror of the thing so exquisite. She was the amateur with whom all. of us could identify, and nobody had told us how dangerous the

w York Times Service

The Advantages of Fiction Over Fact

By Herbert Mitgang New York Times Ser

BATH, England — Gerald Seymour coce had it made as a British television journalist: he carried a company air-travel card, appeared on camera in a street-scarred overcoat ("I was against the romantic trencheoat image") and did his two minutes of stand-up reporting from many of the magic-carpet telines of the world.

Then, three years after his acclaimed first novel, "Harry's Game," was published in the United States and became a main selection of the Book-of-the-Month Club in 1975, he decided to give up the television glamour for the solitude of a novelist.

As a seasoned craftsman behind the microphone and the typewriter whose novels are regularly published in London and New York — a new one is coming from W. W. Norton, his American publisher, this spring
— Seymour has definite views on the advantages offered by fiction over fact for a former

"I'd be very disappointed if I couldn't get a hell of a lot more truth into my fiction than I could in my television reporting," he said. "News on television cannot provide the whole spectrum of a story. The pictures are more important than the correspondent. You're at the mercy of what the cameras capture. If there are no pictures, there's no story. It's different when you can sit down at the typewriter, think about the details and let the nuances come ont in print through your characters."

Seymour, 44, is of that special breed of writer who has stored away his reporting experience and used it. His first covel and a half-dozen others — including "Kingfisher," "The Glory Boys" and his latest, "Field of Blood" concern terrorists, airplane hijack-ings, political kidnappings and escapes to freedom from oppressive regimes. Their set-tings range from Northern Ireland to the Middle East, from East Germany to Afghani-

Some of his novels have been compared with those written by the masters, Graham Greene, Eric Ambler and John le Carré. Ambler has praised Seymour for the "rare pleasures" of his fiction and for writing "considerable novels that are also superb thrillers."

But whether their books are called thrillers, suspense, intrigue or "entertainments," the best practitioners in the genre live by the first rule of the novelist: memorable characters come first.

Although Seymour, a rangy 6-footer with the ruddy face of an outdoorsman, gave up his job as correspondent with Independent Television News, be is not yet finished with television. He has written dramatizations of three of his novels, "Harry's Game," "The Glory Boys" and "The Contract," and a fourth, "Archangel," is now being adapted

Gerald Seymour

The television reporter is something spe-cial — I went to the best news places, getting up before dawn with the camera crew, seeing a little more than newspaper reporters," he

Then came a terrible frustration. My newspaper colleagues were able to write a thousand words, while I was allowed 200 words as the voice describing the film. That meant I could not talk about what I was seeing. At the end of the day, you want to know who the real guys are in a story and what they thought. But you haven't got the air

"Another thing: the success formula of the television reporter can be binding - you learn how to do what is necessary pictorially. That's one of the main reasons I decided to turn my hand to fiction.

"Of course, not every journalist can make the transition. The TV reporter is self-conscions. Most journalists as novelists fail because they are out honest enough with themselves. As a novelist, you expose yourself. If you don't let it out, let it rip, allow your own sonality to show through, it won't work infiction. In news reporting, opinions are ta-boo. But in a covel, by the selection of characters, scenes and subject matter, you do express your opinions.

"In fiction, it's the little guy who matters rather than some general or high public official. If you find yourself explaining the way the Pentagon works in a novel, it's Boresville.

Stream that runs through his land, he pentagon works in a novel, it's Boresville.

Plot and background don't count if you fail in characterization. I like to start with a central character or a situation but try, at first, to suppress who that character will be.

"Journalists are obsessed with the information they've gathered. But in a novel you are not just imparting information. It's not how you use the research that is vital in a novel. You have to have your mind open to ideas and people. An overheard phrase, a paragraph at the end of a news story, can sometimes be built up into a whole

Now that he is out of the daily microphone-and-camera routine, how does he keep up with what current affairs?

"I still mix with journalists," he said. "Occasionally, I meet low-level police. Research does give you confidence when you sit down to write a novel. I'm obsessed with Belfast and have used it as background in a couple of my novels — it's like a foreign country but with double-decker bases. If I'm writing about a place I haven't seen, I go there. I wen to East Berlin for 'The Contract' because I didn't have a special knowledge of that lo-cale. I discovered that if you go as a journalist for a news organization, it gives you credentials. But if you say you're a writer, who are

"Anyway, British and American novelists are very lucky. We have the freedom to write as we please. Graham Greene can stand back and laugh at the authorities. The miracle about Greene is his involvement through his characters and stories - nobody has conned him, cobody is allowed to con him."

· Seymour said he had one built-in advantage: Both his parents were writers. He grew up in the Surrey hills south of London and earned his degree in modern history at London University.

His father was a self-educated man and chairman of the Poetry Society, in London; his mother, Rosalind Wade, who is still writing short stories, has published 30 novels (none in the suspense category). "While most journalists are dannted at the prospect of writing novels," he said, "my parents showed me that it was possible."

Seymour lives with his wife; Jillian, and two sons in a Georgian stone farmhouse on 45 acres (18 hectares), with a view down the valley of a 15th-century church. The six-bedroom house is outside historic Bath, near Radford, a former coal-mining town. If he cares to go to London, he can be there in an hour and 20 minotes on the fast train, but he prefers to stay at home.

There is a different mind-set here; instead of catching the rainbow trout in the rushing stream that runs through his fand, he prefers to feed them. "No, I don't miss the allure of television reporting," he said. "I prefer the

Women Start Polar Trek,

vomen left Tromsö m northern Norway on Tuesday to begin the out on skis across the pack ice on Feb. 20 on the 680 mile (1,100kilometer) trek to the pole. She said the expedition, which would last about 100 days, was primarily scientific, and would include planting radio tracking devices to be moni-tored by satellite along their path to record east-west movements in the polar ice cap.

When the sexologist Dr. Routh Westhelmer offered an hour of therapy, the bidding at a benefit anction in Sun Valley, Idaho, grew spirited, with Terf Shields, mother of the model Brooke Shields, offering a top \$12,000. Her donation to the Scott Newman Foundation, which provides funds for drug rehabilitatioo efforts, prompted Brooke to joke, "Mom buys that, and I get to anction off a trip to Disney World."

Bob Dylan, accompanied by Tom Petry and surrounded by a wall of security men, arrived Mon-day for two concerts in New Zealand. Reporters were brushed aside and photographers had their lenses shielded as the unsmiling superstar made his way through Wellington Airport to a waiting limousine. The unexpected arrival of Sterie Nicks, of Fleetwood Mac fame, added to the chaos. Dylan and Tom Petty and the Heartbreakers begin an Australian tour on Feb. 10.

. . .

Yoko Ono, widow of the former Beatle John Lemon, will appear at a concert in Budapest next month to protest the U.S. "Star Wars" space-based missile defence program, the official Hungarian news agency MTI said Monday. The 'star peace" concert, part of celebrations for the international year of peace, would include a commemorative ceremony for the slain former Beatle, the agency said. · 🖂

went ou display Monday in Lemin-grad's Hermitage museum in the Gale called "the greatest clown in first U.S. Soviet art exchange in this country," Frankie Howerd.

Boris Pyotrovsky, and the U.S. ambassador, Arthur Hartman, said first all-women expedition to the North Pole. Madeleine Griselin, the resumption of such exchanges was expedition's leader, said the group among the fruits of last Novemwould fly to Sprizoergen, and set bet's U. S. Soviet summit, the Soviets of the second secon et news agency Tass said.

> A ship belonging to the French underwater explorer Jacques Cous-teau was damaged when it ran onto an undersea rock near Navarino island in the extreme south Chile, officials in Punta Arenas said Monday. No one was injured and the vessel was not in any danger, they said. Jean-Michel Cous-teau was aboard, heading a team of filmmakers preparing a television documentary on wildlife in the Falkland Islands and the Beagle Channel, the officials said. His father had stayed behind in Puerto Williams, about 70 miles (110 kilometers) from the site of the accient.

Michelangelo Antonioni, 73, the film director, is undergoing physical re-education in Ferrara, Italy, for slight paralysis on the left side of his face, after suffering a cerebral hemorrhage last month, agenformed source said Tuesday. Antonioni has been preparing a new film, "Due Telegrammi."

Larry Gelbart is making his debut as a director in Britain this summer for a show he helped write, it was announced Tuesday. Gel-bart, producer of the TV series "M*A*S*H" and author of the Dustin Hoffman movie "Tootsie," is directing "A Funny Thing Happened on the Way to the Forum" at the Chichester Festival theater, "He's the first American ever to direct at Chichester," the theater director John Gale said in announcing the south-coast theater's .25th anniversary season. Gale promised "the most spectacular settings ever seen at Chichester" for "Annie Get Your Gun," with the American rock singer Solid Quatro as Annie Oakley, which opens the season on April 16. Gelbart directs the season windup in the "Forum" show he co-wrote Forty paintings from the U.S. with Burt Shevelove, with music National Gallery in Washington and lyrics by Stephen Sondheim. It
